and Show cattle from across the world!**

matching your genetic needs

Trans America Genetics aims to offer dairymen solutions to their needs of increasing profit margins. TAG's Genetic focus is breeding cows that will sustain high performance level for many lactations. TAG & its business partner, Androgenics, strive to release the best product possible for increased conception rate. Each dose of semen is packed with at least 30 million sperm cells. Mr Top and Domain are our first sires to receive semen fertility score in the US. As expected, they achieved a very high ranking among the actual bull population.

Dear Holstein Enthusiasts,

In front of you is the new Hotspots, again this issue is full of the latest news, top genomic lists and most importantly beautiful cows!

Focused on providing breeders with relevant information, Hotspots starts now with bringing you management articles suitable for your daily work in breeding and managing your own personal program. The goal of these articles is to keep it practical, things that you can use right away on your farm and in your breeding program. The continued response and feedback for Hotspots has been overwhelming. We appreciate all the Holstein enthusiasts who look towards Hotspots for the latest information on Holstein cow families and genetics! As we make our way through the first half of 2011, we have seen a high level of interest in elite Holstein genetics. Sales worldwide have been successful in marketing genetics from top cow families. Holstein Plaza and Eurogenes are proud to have assisted sales and breeders in accomplishing this. The demand for elite genetics will continue to climb and the world will be more and more one marketplace. Holstein Plaza and Eurogenes will be here to facilitate and help getting you the news AND genetics delivered to your door. Networks are vital to the success of any industry and it is our goal to continue connecting farmers with elite Holstein genetics all over the world.

We hope you enjoy reading this magazine and will continue to let Eurogenes and Holstein Plaza serve you in the capacity in which they were created for: delivering the latest news and the best genetics straight to you door!

Best regards, The Hotspots Team

Ladys-Manor Ruby Jen

➔ 7 Consecutive Generations of Bull Mothers

For seven consecutive generations the Ladys-Manor Ruby Jen family has been putting bulls into A.I. and sourcing the world with elite Holstein genetics. To add to their credits, this family also just happens to have the current #1 genomic sire globally, Shamrock +2487 GTPI.

The excitement surrounding this cow family continues to build for the Smith family and the prestige of the Ladys-Manor prefix continues to captivate Holstein enthusiasts worldwide. In spite of this, the Smiths admit that initially they were apprehensive about genomics and had concerns regarding accuracy.

"Then as we started getting genomic results within our main cow family (Ruby Jen) that were consistent with the seven generations of bull mothers we had developed, we felt as though this could be a valuable tool," Smiths said.

From the Beginning

While there are branches of this tremendous Ruby Jen family being developed across the world, it is at My Lady's Manor Farm that this family began and 14 generations later still carries the Ladys-Manor prefix.

Across many sale catalogs you will see this family traced back to a cow from the late 1960s named Ladys-Manor Nancy Archie Excellent-90 2E GMD and sired by Ladys-Manor Ivan Archie. The pedigree continues with a Very Good Astronaut daughter followed by a Very Good-88 GMD DOM Jemini. Next came the strong and powerful Top Gun Jemini dam to the great Ladys-Manor Winchester bull. Jemini was sired by Cleitus, scored Excellent-93 3E GMD DOM and to further add to her credits had records over 36,000 milk, 1200 fat and 1100 protein. Jemini's Blackstar daughter, Ladys-Manor Temptress

Jem Excellent-91 GMD DOM is where the family really starts to branch with top bulls and locator list cows showing up across all lines.

The Autumnns

The poster girl for Dixie-Lee Aaron, Ladys-Manor Autumn Very Good-89 GMD DOM is a great-great granddaughter of Temptress Jem. Her dam was a Very Good-86 GMD DOM Winchester so a double cross of this great cow family. The grand dam, Ladys-Manor Temptress Am was Very Good-89 GMD DOM and sired by Melwood. Am is the dam of the Elton Temptor bull at Alta Genetics and also through this line produced the BW Marshall son, Wildman. The extremely balanced Autumnn is also recognized across the industry as dam of the following popular bulls: Ashmore, Augusta, O Autumnn and Auden. This family continues to be developed at My Lady's Manor through Autumnn's Very Good Planet and Goldwyn granddaughters to name a few. A close look at the April 2011 Top CTPI list you will also notice that the #48 CTPI Cow of the Breed is a Toystory granddaughter of Autumnn.

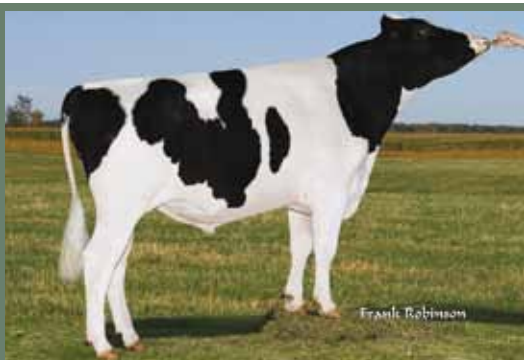

It is also through this line that Ladys-Manor Durham Am-ET Excellent-91 2E GMD DOM was produced. The daughter of Temptress Am, Durham Am has multiple records over 40,000 lbs. of milk and close to 166,000 lifetime. She also has numerous Very Good and Excellent offspring including the Excellent-92 Titanic daughter AM Tasha-ET.

BW Marshall Sisters of Wabash-Way

The popular BW Marshall full sisters of Wabash-Way also trace through a branch from Temptress Jem. The Stammens got into the family by purchasing a pick of a flush by Aaron from the Excellent-90 DOM Bellwood Antoinette cow. There were no Aaron heifers from the flush so the Stammens got a Durham heifer instead; Ladys-Manor

Rick VerBeek, Dairy Sire Analyst, Select Sires, Inc.

"Ladys-Manor is one of my favorite herds to work with and Robert and Sam make a great team. Shamrock is the result of a contract mating for Select Sires. At the time Planet was the #2 TPI sire of the breed and Shottle had just become the #1 TPI sire based on his second crop daughters. It turned out to be a very prolific flush with the two sons in the top of the genomic list, Shamrock and Shameless, one female already Very Good at Ladys-Manor and a female selling for \$50,000 in the National Convention Sale. Genomics confirmed the strength of this family and now we can use genomics to correctively mate each individual and keep this family at the top of the breed."

Ladys-Manor PI Shamrock • #1 Genomic Sire of the Breed

Ladys-Manor Autumn VG-89-USA
The "Poster Girl" for Dixie-Lee Aaron

Wabash-Way Mar Annileigh-ET EX-90-USA GMD DOM
Sons in A.I. and numerous high scoring daughters

Wabash-Way Arleigh-ET VG-88-USA
Dam of the #1 Pronto daughter in the U.S.

Annibell-ET Very Good-85 DOM and the branch at Wabash-Way began. Annileigh and Annimarie are daughters of the Very Good-85 DOM Durham from the Excellent-90 DOM Bellwood followed by Tempress Jem.

"The best part of the family is they transmit fantastic udders that give lots of milk. They are strong cattle that do well in our operation," Stammen said.

Both BW Marshall sisters are credited with huge milk production records and GMD DOM status. Annileigh has numerous high scoring daughters worldwide including the well-known Anelisa Excellent-91 GMD DOM Finley daughter. Interesting to note is that Anelisa's Shottle daughter; Wabash-Way Andreana-ET Very Good-88 DOM was the #2 CTPI cow of the breed when Wabash-Way Emilyann-ET was number one.

The current #1 Pronto daughter in the United States also stems from the Wabash-Way branch. Broeks Apple-ET Very Good-86 at two-years-old has a GTPI of +2096 making her the #1 Pronto daughter in the United States. Apple's dam is the VG-88 Shottle, Wabash-Way Arleigh-ET, followed by Annileigh Excellent-90 GMD DOM. Apple's maternal sister, Broeks Annie-ET Very Good-87 at two-years-old, is currently the #8 Jet Stream in the United States. Apple and Annie are currently owned and being worked with at Ever-Green-View Farms, Waldo, Wis.

Due to the popularity and marketability of this family the BW Marshall sisters did sell; Annileigh was sold to Markwell Holsteins, Lyden, Washington and Annimarie to Stanton Bros. Ltd, Ilderton, Ontario. However, Wabash-Way continues to develop this branch of the family through the Bolton daughters and the younger generation of heifers by Domain, Super and Planet.

Terrence Stammen Wabash-Way Holsteins

"The best part of the family is they transmit fantastic udders that give lots of milk. They are strong cattle that do well in our operation"

In Germany, Ingo Rose has been extremely successful with this branch of the family. Anni Very Good-86-DE-2YR (Shottle x Annileigh EX-90-USA) is one of the highest indexing cows in Germany and dam of STERNGOLD at RUW Germany. This Stol Joc son is the #17 g RZG bull in Germany (DE 04/11 g RZG 143) and has been used as a sire of sons already!

Ruby Jen

Ladys-Manor Ruby Jen Excellent-94 2E GMD DOM is famous worldwide and one of the most popular and adored Startmore Rudolph daughters. Ruby Jen delivered many Very Good and Excellent daughters and some very popular bulls like the BW Marshall son Marbach at the WEU in Germany and the Igniter son, Rigorous, at Semex.

The mating of Mandel Debut on this blooming brood cow has proven to be very instrumental for the Smiths and produced Ladys-Manor Ruby D-ET Excellent-90 GMD DOM. Ruby D is the dam of four Excellent cows including the the popular Shottle (Ruby D Shawn) and Goldwyn (Ruby D Grace) daughters.

On the April 2011 Top Genomic Sires List, Ruby D had three grandsons in the top 14 with Shamrock headlining at number one, Grafeeti at number 12 and Shameless at number 14. The popular chart topping Shamrock is a Planet from the Shottle daughter, Ladys-Manor Ruby D Shawn-ET Excellent-90 DOM. Shamrock has maintained the top position for the last two runs and also tops the net merit rankings at an astounding value of \$936. This has also led his three full sisters to be in high demand and highly valuable. Ladys-Manor PL Shakira sold through the 2010 National Holstein Convention Sale held in Minnesota with Darin Meyer, De-Su Holsteins, New Albin, Iowa as the successful buyer at \$50,000. Shakira has maintained her position in the top five genomic females for the last four proof runs. Ladys-Manor PI Shandra was consigned to the 2010 Eastern Elite Sale and was the top selling lot at a commanding \$16,000. The third full sister, Ladys-Manor PI Shania calved in this spring and scored Very Good-85 VG-MS at just one year and eleven months of age!

Ruby D Shawn will be six-years-old this fall and still calls My Lady's Manor home. Shawn is easily a herd favorite for the Smiths, "Shawn is just a treat to work with, she flushes great is easy going and very laid back," Smiths added.

Tim Abbott, Director of Sales/General Manager, ABS Canada/St. Jacobs ABC

"I have worked with the family at Smiths for generations and we have had several very solid bulls from the family. The cow that always put it together best for me was the Rudolph herself. A great dairy cow with a tremendous udder and frame a fun cow to use as a bull mother. At the time we did the Debut mating on her he had just gotten his proof and looked very interesting. It looked like he would sire great components and beautiful udders. We had very little semen to use on the bull and I wanted to make sure he got used on the best cows in my area. I thought he was a great mating on the Rudolph and Rob and Sam agreed. As it turned out, it was a good choice as the Ruby D cow has done all we had hoped for and more. We have worked with the cow and have two very good sons of her Dodge (Goldwyn) and Shout (Shottle) in our proven line up. Both bulls transmit the great udders and high components you would expect from the family. So while Debut was not a household name, his daughters have turned out to be great transmitters and putting him into this great maternal line has really paid off."

Robert and Sam Smith My Lady's Manor Farm

Shawn is easily a herd favorite.

"Shawn is just a treat to work with, she flushes great is easy going and very laid back."

Back to Ruby D, along with her chart-topping grandsons she has three sons currently in the active lineup at ABS Global, Inc. Shout by Shottle and a full brother to Ruby D Shawn continues to gain popularity with youthful udders and tall, long dairy frames. The Goldwyn son, Dodge, and Garrison son, Donald are also in the active lineup and being used heavily worldwide. Also interesting to note is Shawn's full sister Ladys-Manor Ruby D Shana-ET Very Good-86 DOM owned by Brigeen Farms is dam to the popular Mac son at Select Sires, Brigeen Russell. This is just another testament to the A.I. influence of this great cow family.

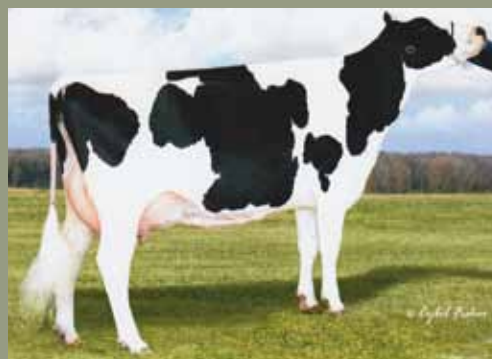

Ruby D Grace Excellent-91 DOM sired by Goldwyn is your cover girl for this issue of Hotspots and is the dam of Grafeeti, the Freddie son that is #12 on the Top Genomic Sires list for April 2011 and the former #1 GLPI young bull in Canada. Grafeeti is already making headlines siring high selling choices across the country.

Another famous Ruby Jen daughter is Ladys-Manor Ruby Marcie Very Good-87 GMD DOM, a BW Marshall daughter with a Boliver son, Marcellus, at Genex. Ruby Marcie's Boliver daughter, Marcie Babe topped the A Knight at Kingsmill Sale in 2007 at \$46,000.

Ladys-Manor Ruby D-ET Excellent-90 GMD DOM continued her career in Durham, North Carolina selling to Kingsmill Farm through a private treaty in the fall of 2006. At the same time of acquiring Ruby D, Kingsmill also purchased her Goldwyn calf, Ladys-Manor Ruby D Gigi-ET Very Good-89. Several heifers have sold from Gigi by Big Time, Million, Super and more in 2011.

The Future

The popularity of this A.I. family will only continue to grow and develop. While the success of this maternal line can be seen over several generations the mating possibilities with the current Ruby D daughters and granddaughters proves to be very exciting. Only time will tell how this famous family will continue to impact the industry and provide elite Holstein genetics to breeders worldwide.

Taurus Service has always selected bulls based on outstanding cow families. Careful attention to these successful breeding lines has provided "Profitable Genetics" for our customers around the World for 40 years. Genomics helps to solidify the choices we have made and helps guide our future selections. "Profitable Genetics" in the dairy herds we serve is our goal each and every day. Genomics offers opportunities and we want to work with breeders to offer the best genomically proven sires available and help breed a more profitable cow.

Taurus Total Value (TTV) is an index developed by Taurus Service as a ranking system of the Holstein sires in the "Profitable Genetics" sire line-up. Taurus has always strived to market semen from sires to produce cows for optimal production with high components, longevity and reproduction. TTV includes NM\$, TPI and PTA Type along with PTS's for Udder Composite, Feet & Leg Composite, Productive Life (PL), and Somatic Cell Score (SCS) weighted by percent reliability. We put extra emphasis on the traits to ensure herd improvement and net profit.

All Sires above on the top 100 GTPI List.

HolsteinPlaza.com is the online marketplace connecting farmers with elite Holstein genetics from breeders throughout North America.

Regancrest Farms
www.holsteinplaza.com/regancrest

Announcing the Regancrest Summer Select Sale to be held at the farm on Saturday, Aug. 19. Eighty lots sell featuring the best of Regancrest and special guest consignments. Mark your calendars and plan on attending.

Rugg-Doc Holsteins
www.holsteinplaza.com/rugg-doc

Ralma Goldwyn Carmel-ET VG-89-2YR continues to gain attention of Holstein enthusiasts worldwide. Carmel's Baxter daughter, R-Z Baxter Caramel-ET, made her debut at #18 at GLPI+2811 on the Top Genomic LPI Cow Report - April 2011.

Scientific Holsteins
www.holsteinplaza.com/scientific

Scientific Holsteins, Matt and Mandy Nunes family will be hosting the 2011 Wisconsin Holstein State Picnic scheduled for Saturday, Aug. 27 at the farm, Chippewa Falls, Wis. The Nunes family invites everyone to the farm for this great Holstein event!

Welcome-Stock Farm
www.holsteinplaza.com/welcomestock

Unique-Style Bolton Money Excellent-91 is the #6 GTPI cow following the April proof run and the #2 Bolton daughter in the United States. Bolton Money is just one of many high profile cows being worked with at Welcome-Stock.

Ziem-Barb-Way
www.holsteinplaza.com/ziem-barb-way

Jacobs Goldwyn Jenna VG-89 EX-MS recently won the junior three-year-old class at the New York Spring International Holstein Show. Jenna is also the #9 PTAT Cow in the United States at +3.93T.

Gillette Farms
www.holsteinplaza.com/gillette

It was an exciting April proof run for Gillette Farms... Gillette Windbrook (200H003501) moved up to #2 LPI Sire and Willrock and Wildthing two identical Marion twins from 2nd Wind made their debut at #5.

Misty-Springs Holsteins
www.holsteinplaza.com/misty-springs

Misty Springs MB Brighter-Red the #2 Red & White GLPI cow in Canada at +2379 sells in the Rocky Mountain High Sale on July 7, Cochrane, AB. Brighter completes seven generations of VG or EX and has several high sons and daughters.

Passion Holstein
www.holsteinplaza.com/passionholstein

Regancrest-I Mika-ET scored VG-87-2YR-CAN just 82 days fresh and calved at 24 months. Her breakdown is 87-udder, 88-rump and 86-feet, 86-dairy strength. Mika is a Mac from the Barbie family and a 10th generation VG or EX.

Stanton Farms
www.holsteinplaza.com/stanton

The April proof run proved to be very successful for the daughters of Emilyann and Evett at Stanton Farms. Ms Wabash-Way Atwd Emily-ET (Atwood x Emilyann) came in as the #3 PTAT heifer at +4.81 with a GTPI +2324.

Ever-Green-View
www.holsteinplaza.com/ever-green-view

Ever-Green-View Farms was recognized with the Herd of Excellence Award by Holstein Association USA. The rigorous criteria to qualify includes: must be 25 percent above breed average Mature Equivalent (ME) for milk, fat, and protein; must have classified within the last year and have an actual average classification score of 83 points or higher; and must have at least 70 percent of the herd homebred.

Gold-N-Oaks
www.holsteinplaza.com/gold-n-oaks

The Gold-N-Oaks M family continues to produce the high ones. Shottle Marbella's Active daughter, Gold-N-Oaks Solitare 1913-ET VG-85-2YR is the #1 Active daughter in the United States at GTPI +2279.

Mercuro Farms
www.holsteinplaza.com/mercurofarms

ATM daughters have been in high demand at sales across the United States this spring. Selling on the National Holstein Convention Sale is ATM's *RC Pembroke +2223 GTPI and a maternal sister to the #8 Genomic Sire, Armitage.

Hurkmans ET

Totaalconcept Embryotransplantatie

Hurkmans ET Donorstation and “On Farm” embryo transfers

- More than 20 years experience in flushing and “On farm” flushing and ET
- Competitive price rates and discounts at 5 or more flushes / year
- EU approved donor station
- We take care of your valuable animals, produce, freeze and store their embryos
- We can export your embryos worldwide from out of our facilities

Donor Management by Hurkmans ET

- Boost up your embryo production with our QRF Program (3 flushes in 70 days)
- Professional support to make your donor cows profitable.
- Advices on superovulation, synchronisation, feeding donors, bull choice, marketing and veterinarian issues.

Embryo-Recipient Management by Hurkmans ET “Send your embryos to us and we will deliver you your calves”

Hurkmans ET has several recipient herds available where we transfer your embryo's. We take care for synchronisation, transfers, preg- checks, and we inform you when your calves are born and ready to pick up.

Housing facilities

Hurkmans ET has a wide experience with the Donor Management and Embryo Recipient Programms. Many breeders and organizations around the world have chosen already for Hurkmans ET.

Current interesting cows in our Donor Station:

- B BWM Mae (BWM x Whittier-Farms Lead Mae EX-95)
- Oelhorst AK Ikessy VG-88 2yr. I QRF program: 38 embryos in 100 days
- Bacchus Eliza Mae (#1 LPI Alexander dtr) I QRF program: 24 embryo in 3 flushes
- Bacchus Roxy 2 and 3 Red (Grand dtrs of Debutante Rae) I Over 30 embryo produced
- Caps Mairy 14, #1 GTPI heifer in Europe I Starting now

- AJDH Virosca Socra and DG RMR Andrea (#1 GTPI Roumare dtr) for Misty Springs Holsteins Canada. Both have been in our Donor Management programm, and more then 30 embryos have been exported to Canada

EUROGENES MEMBERS

Uk & Ireland continued...

1. OVERSIDE HOLSTEINS

Overside Holsteins is home to the VG89-2yr Jenny-Lou Marshall sister to Pine-Tree Sid! Outcross Overside Lou Minnie has daughters by Hayden, Bogart and Million and a huge first record of 11,620kgs. The Amanda line of the August family is breeding well with a flashy pair of VG86-2yr old Baxters milking alongside Dellia's and Debbie Jo's.

2. SYKE HOLSTEINS

Syke Holsteins were the first UK breeders to invest in the Jodie family, with a VG88-2yr Redman and a VG87-2yr Talent daughter of Fradon Rudolph Jodie EX. Further Red interest is present through Tegan Advent Mahogany Rox Red 2 VG86-2yr, and the August line is now at Syke through Bricknell Integrity Amanda VG89.

3. BALLYELLY HOLSTEINS

Ballyelly Holsteins have some great youngstock coming through the system. Ballyelly Planets Aisling was bred from Smiddiehill Toys Ambrosia VG87-2yr, off the family that bred the proven bulls Aspen and Astronomical. Willsbro Man O Man Lila Z was purchased at the 2010 Willsbro Sale and will establish the next generation at Ballyelly.

4. MAJESTIC HOLSTEINS

Majestic Holsteins house the highest GTPI Earnit in the breed, Majestic Earnit Annette, bred from Morningview Oman Annette VG87-2yr. Two full sisters also look great for the future with Majestic Shottle Leona VG87-2yr and Shottle Licorice VG87-2yr both bred from Savage-Leigh Leona EX94-USA, Licorice's twin sister!

5. BALLYCAIRN HOLSTEINS

Ballycairn Holsteins follow a breeding strategy that looks to maximize genetic potential with good, functional type and high yields without compromising on fitness traits. Families have been sourced from across Europe and beyond with many exceptional individuals now proving themselves. These include Tinnie's, Pietje's, Lou Etta's and Horizon's.

6. CONN CORR HOLSTEINS

Conn Corr Holsteins are working with a number of exciting families, including Avis, Altitude, Amanda, Dellia, Jodie, Lustre, Lila Z, Roxy, Mahogany and Ivory. One outstanding individual is Conn Corr Goldwyn Larissa VG87-2yr, sister to the dam of Goldwyn Lotto, the Royal Winter Fair Champion 2010.

7. TUBBERTOBY HOLSTEINS

Tubbertoby Holsteins are Irish breeders who have invested in some top North American and European families. Tubbertoby Redman Jodie VG88 and Shottle Paradise offer real potential, while Tubbertoby Talent Madison VG88 x EX92-2E Wisenfield Derry Madison originated in Germany and looks good for the future.

8. ANSAVALLEY HOLSTEINS

Ansalvalley Genetics are developing a number of popular UK families including the Sharon's and Peach's alongside the more international Ambrosia, Pledge and Miss Maui. Current highlights include the EX full sister to Picston Shottle and show winner Ansa Sho Peach, nominated All Britain Junior Maiden Heifer 2010.

9. HOLMLAND HOLSTEINS

Holmland Holsteins is home to some great cows, including ALH Polly VG89-2nd calver, a high yielding, high fat Titanic straight out of Pledge, Ridgefield Durham Brosia VG86-2yr and the impressive Holmland PS Rachel Red VG89-2nd calver who was Red & White Champion at the UK National Show 2010.

10. REDSKY HOLSTEINS

Redsky Holsteins are totally focused on breeding the best Red & White's available. Current stars are Overside Elayo Delight Red VG87, bred from an EX91 Talent of the Dellia family, and her Savard daughter. Redsky Sav Delight Red, born in December 2009, will sell in the Black & White Sale in December 2011.

11. STARDALE HOLSTEINS

Stardale Holsteins have bred some great UK families over the past few decades, with the Vaakje and Stella families predominating, each with some pedigrees carrying ten straight EX cows! Stardale Royal Stella 3 EX95-11E LP110 won Genus Long-Life Cow of the year 2010. Other successful families include Adeen, Elegance and Vanessa.

12. ADI CATTLE CORP

ADI Cattle Corp have extensive international experience within the Holstein industry. Their primary motive is to supply clients with the genetics or services needed to meet their breeding and marketing targets. ADI source Embryos, Show Cattle, Elite Pedigree'd Individuals and Commercial Heifers for their clients.

13. STERNDALE HOLSTEINS

Sterndale Holsteins breed show cows, both black & white and red & white. The Ghost family are winning around the UK this year with Sterndale Goldwyn Ghost VG89-3yr looking great. Sterndale Miss Rose Red VG87-2yr took the Red title at the UK National Show in 2010, a stylish SS Deuce from Redrose's family.

14. DROINTON HOLSTEINS

Drointon Holsteins have invested in some prolific brood cows in recent years and through extensive ET work, now offer some outstanding pedigree's. Drointon Leduc Brenda EX95-3E has bred well alongside the Edna line of the same family and the Brianne's and Hope's also stand out. A bit of colour in the herd is provided by the August family.

15. HYDAWAYS HOLSTEINS

Hydaways Holsteins have a gem of a herd based primarily on solid Canadian pedigrees. Ecstasy Faber Raquel Red EX94-2E (4th calf) has been the start of a great line of Roxy's at Hydaways, already leaving a VG86 Mr Burns daughter and son Hydaways Mr Ronaldo Red EX92 is marketed through GB Bulls.

16. WYNDFORD HOLSTEINS

Wyndford Holsteins have expanded their herd to include some high profile individuals. Huddlesford Mrs Melody, an EX90-2nd calf Mr Sam is currently on flush, while Ashleigh Amanda EX94-2E, a Ja-Bob Jordan daughter off Altitude already has daughters by Shottle, Goldwyn and Regiment Red.

17. WETHERTON HOLSTEINS

Wetherton Holsteins have an elite group of pedigrees including two VG Durham Zindra's bred from Ocean-View Eland Zindra EX, high genomic Brenda's from Mtoto's family and a full sister to new bull Windy-Knoll View Primetime of the Promise line. More recently, a share in Oman Missy was acquired.

18. CRYSTALCLEAR HOLSTEINS

Crystalclear Holsteins are an emerging force within UK Holsteins. With descendents of Barbie, Caye, Dragonfly, Bliss and now DT Britney from Henkeseen Heidi Blush, you can expect to see some interesting opportunities from this herd in the future.

19. SHANAEL HOLSTEINS

Shanael Holsteins is home to one of the best Bolton daughters in the world! Shanael Bolton Golden is scored VG88-2yr old (VG89 MS) and has produced 16,160kgs in her first 305day lactation. Other families Shanael are working with include Tripoli, Melody and Jodie, whilst there is youngstock from Nova-TMJ Golden Echo VG88 and Morningview Shtl Asset EX.

20. ECSTASY HOLSTEINS

Ecstasy Holsteins owns a selection of key families with well bred individuals often offered to the market. Recent years have seen some investment in popular families with Roxie's, Kitty's, Sweet's and Gloriette's go on to do well for their new owners with the Red Raquel family developing into one of the best lines of August's.

21. RICHAVEN HOLSTEINS

Richaven Holsteins won the UK Premier Pedigree Herd 2009. Large framed cows with great udders and legs & feet, they are scored 100% VG/EX, including 2yr olds. Goldwyn has worked particularly well - Richaven Goldwyn Adrienne is now EX-2nd calf, while Richaven Goldwyn Birdy scored VG89 with her 2nd and Richaven Goldwyn Irene is VG88-2yr.

22. BB HOLSTEINS

BB Holsteins are currently working with a number of international families including Dellia, Pala, Jewel, Tiana and Pamela, but one of their strongest has to be the Ghost family which has performed consistently well in the UK for 15 years. BB Damion Ghost VG89-2nd calver has two VG Baxter sisters, one recently scored VG88-1st lactation.

23. GOLDEN PROMISE SYNDICATE

The Golden Promise Syndicate was formed between five partners who shared the common interest of investing in the very best Holstein families the world has to offer and making top cattle available to both the show and genetics market. Members of key families like Promise EX95-2E, Leader Melanie EX96 and Baler Twine VG have since been bred.

24. SAHARA HOLSTEINS

Sahara Holsteins is an elite herd of top show and genomic animals. Recent European investments include Koepon Shot Regenia 7 VG88, RR Ralma Million Cream, Apina Fleur, VVH Man-O-Man Isa 6 from the sister to Iota, and the no. 5 GTPI Man-O-Man in Europe, UFM Dubs Skye (GTPI +2308, 04/11).

25. DULAIS HOLSTEINS

New members Dulais Holsteins have an exciting group of youngstock that will form the base of a terrific new herd. Recent purchases include Million dtrs Caramel and Dellia, whilst there are high genomic heifers due to calve in early 2012 including Dior Rae, Roxy, Ashlyn, Amanda, Sara and Ghost. One to watch!

26. CURTISMILL HOLSTEINS

Curtismill Holsteins have bred two Baxter daughters already in demand. Both Curtismill Baxter Odyssey 3 and Baxter Odyssey 5 have scored VG87-2yr and trace back to the Inka's. The Hatascot family have several sons in UK AI with more contracted for Europe from Curtismill Shottle Hatascot 2 VG89, the same family as Roseo Joe.

27. MIKALI HOLSTEINS

Mikali Holsteins are breeding from a number of proven UK and international families. Smiddiehill Sandy Valley Erle VG88, has bred a VG87-2yr Damion who in turn, has a stylish Toystory. Red interest has come in via the Newton Belle family which has done well in the UK and Wedgwood Royalty Storm EX94-5E is still looking great.

28. RISEUP HOLSTEINS

Rise Up Genetics are the result of an international breeding program, with top brood cows on either side of the Atlantic. Rise-Up JS Berry VG-USA-2yr is an interesting Jet Stream x Best x Addison that is housed in the US, whilst German-bred Regini, an Overside Dictator from the Saturday family, is leaving progeny in the UK.

29. LOFORD HOLSTEINS

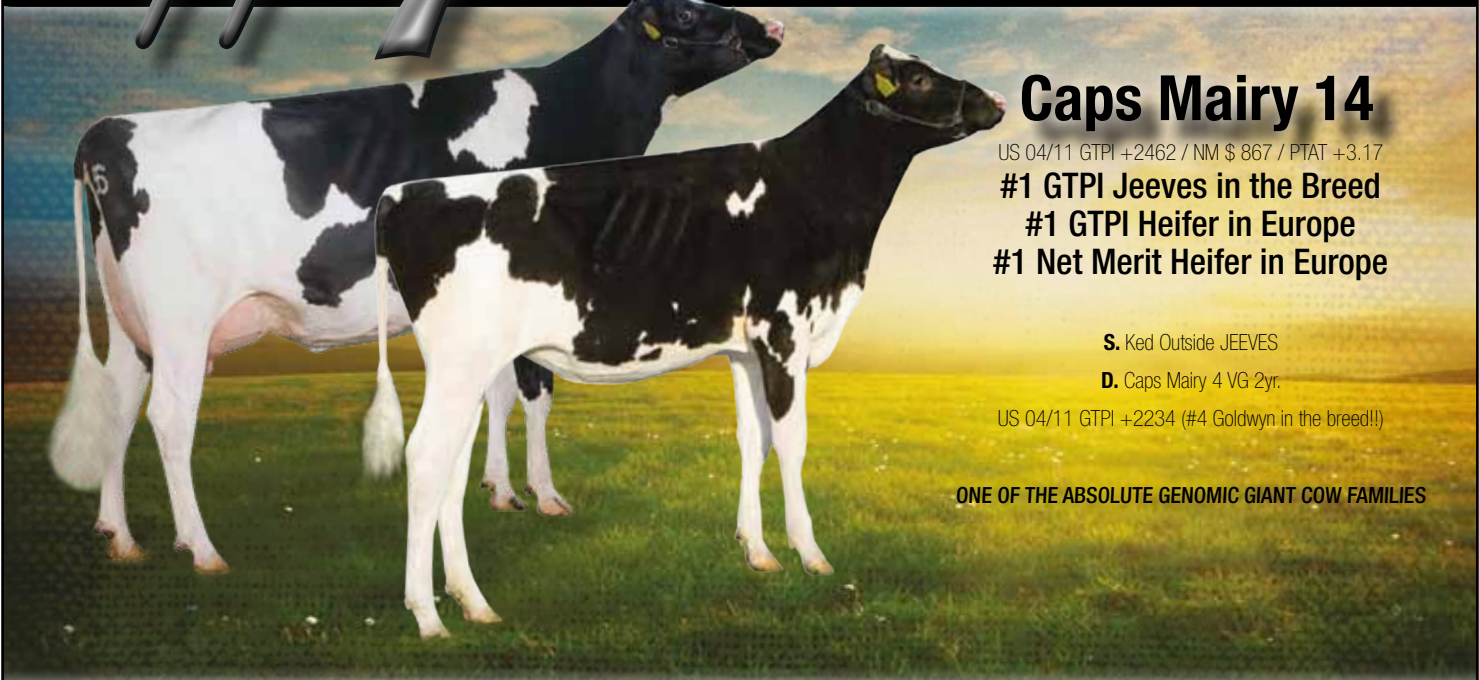

Loford Holsteins have an array of fancy cows, including some highly scored Shottle's; Loford Shottle Rhonda VG89-3yr is bred from Brigeen Convincer Rhonda EX95-2E (Roxy). Loford Shottle Marci 15 EX91-4yr hails from the Henkeseen Mark Marci family. Shottle Marci 16 VG89-3yr and Shottle Marci 13 VG88-3yr prove the consistency of this foundation family.

30. WILLSBRO HOLSTEINS

Willsbro Holsteins need no introduction, as they are probably the most extensive collection of elite Holsteins in the world at the moment. From Atwd Bailey and Emilyann to Lustre and Lila Z, most of the breed's best are represented here, with annual sales featuring females of all ages from the world's greatest cow families.

Once in a lifetime opportunity! Make plans now

and join us for our RED TAG SALE during the 2011 National Convention. "Virginia is for Holstein Lovers," and you'll love that we will have over 30 head priced for the times out of these fantastic cow families. Virtually everything will be tagged including Durham, Goldwyn, Advent, Shottle & Destry daughters from these ladies. We think the Lana Rae's are the truest breeding branch of the Roxy's for consistently beautiful udders with low SCC. We will be a featured tour stop, so come see for yourself!

MANAGED BY HANOVER HILL SALES & MARKETING LTD. | BARCLAY PHOENIX 905-431-8340

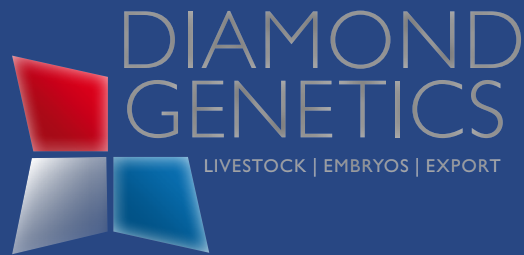

Don't forget to ask about boarding & flushing options for international buyers.

Also an exciting new opportunity for international buyers...

Inquire about "exclusive rights" to flush Lana Rae to the bull of your choice!

Supplier of Success...

EMBRYOS AVAILABLE

Bolton Janice just scored Very Good-87 at only 10 days fresh and is only getting better. She has a Planet son that will be tested soon to enter our young sire program. M Janice, a BW Marshall, recently scored a perfect 100 for feet and legs and is now Excellent-93. This family is functional and profitable, and you can get in at the ground level.

Contact us for current embryo inventory or to place an order for future embryos. Don't be left out of this extraordinary family!

→ Hints to get more calves on the ground

Finally you have your precious embryos to put into re-cipients. But how do you make sure that most of them grow into a calf? We spoke to some specialists in the world of ET and they give exclusive advice about improving your re-cipient management. Hotspots helps you to get more calves and more profit from embryo transfer!

The difference between a low and a high recipient pregnancy rate can be huge: anything from 20 to 80 %. Think what you could have done with five or six more calves out of ten embryos? More calves means more bulls to sell to the AI Centre, or more interesting females in your herd and a bigger change of having the next generation of interesting genetics in your barn! In the end it simply means; the higher the pregnancy rate, the more the profit.

Think what you could have done with five or six more calves out of 10 embryo's

How can you influence the pregnancy rate with your recipients? ET specialists know. They first advise you to start your recipient management at an early age. Make sure that the calves and heifers from the age of 10 or 11 months are fed rough hay with a lot of fibre. Secondly, ensure they get enough concentrates for their energy need. Their manure has to be so thick 'that they almost have to cry', one specialist jokes. Check their body condition frequently so you can adjust the

The difference between first or second class fresh embryo's is close to nothing

ration. This is a very easy ration, which can be corrected fast if the heifers get too fat, because fat (or too skinny) recipients are less fertile. The ideal body condition score to feed for is advised as 2,5.

Necessary minerals

In this preparation period, the mineral intake is also important. By using a (good) young stock mineral bolus, you are sure that the animals get enough of every single mineral. Of course powder minerals will do as well, but the feeder has to be extremely consistent and pre-

Pat McEvoy, Ireland: "We score 90 %"

"The higher the pregnancy rate, the higher the profit." Pat McEvoy has in Ireland a specialized recipient farm with 60 to 80 animals. "We buy embryos, put them in and sell the bulls and heifers", Pat explains. The pregnancy rate is about 90 %. "Last year we had a flush with one of our own cows, sexed the embryo's, put the females in and achieved 100 % pregnancy rates. Even for us this was incredible." Pat buys beef crossbred (most Hereford x HF) recipients at an age of 1 to 1,5 year. "When they are 24 months, we put embryos in. I want the heifers on our farm for at least four months first, to enable them to adjust to their diet and surroundings." Although the heifers come from different farms, their health status are about the same. "We test them all: for tuberculosis, IBR, Brucellosis and all other diseases that can cause infertility or abortion."

One of the most important things for reaching this high pregnancy rate is the feeding. The heifers get as much hay as they want, every day 5 kilo concentrates (with 14 % protein) and about 20 to 40 gram high omega-3 minerals. "HF heifers would need 10 kilo concentrates per day", says Pat about his choice for the beef crosses. "The beef heifers are also less stressful and that increases the pregnancy rate." He also mentions that communication with the technicians of Paragon, his ET-service, is very important. "I do exactly what they tell me to do and still learn every day." For example Pat prefers to put grade 2 embryos in recipients that have been in heat not 7, but 6 days ago. "I can choose the right timing by removing the spirals. You need to exchange this information for the best results."

KEYNOTES for the best pregnancy rates with ET

- Heifers have higher pregnancy rates than cows
- Start recipient management at 10 months
- Buy heifers not older than 10 months
- Make sure the health status is high: negative or vaccinated for IBR, BVD etc.
- Feed roughage with fiber and concentrates
- Feed minerals, selenium and vitamin E
- Make sure the heifers are in a 'growing' condition
- Fresh embryos give 10 to 20 % higher pregnancy rate

cise. With a bolus, you can cover the mineral supply until 17-18 months of age. Some specialists also advise an extra injection of vitamin E and selenium in this period as these two are key elements for fertility. By starting to manage the minerals at a young age, you make sure the heifers adjust over a few months to a good, constant diet, ensuring they are healthy and fertile up to the moment the embryo will be implanted. This preparation is of great importance for good pregnancy results.

By the time the heifers are between 13 and 15 months, they are ready to put embryos in. Older animals are fatter and most of the time less fertile. Make sure that the heifers are in a 'growing' condition when you put the embryo in, this stimulates the pregnancy rate. And try to pick the right timing in climate. When the temperature goes up to 30 degrees Celsius (or more than 86 Fahrenheit), the heifers need too much energy to keep cool; they eat less and drink more. In short it means that they are busy surviving and getting in calf is not part of that.

Pat McEvoy (Ireland)

“Feeding is one of the most important things:

Unlimited rough hay with lots of fiber,
enough concentrate and really important are
the high omega-3 minerals.

We score a 90% pregnancy rate”

Fresh gives the best results

You will get the best results by putting fresh embryos in. The pregnancy rate achieved should be about 60 to 80%. The difference between first or second class embryos is close to nothing, the second class embryos require a good match between development of the embryo and quality of the recipient. Frozen embryos 'stick' less successfully; the pregnancy rate is usually 10 to 20% lower with an average of 50 to 60%. Every handling, freezing, sexing or splitting weakens the embryo and results in a lower pregnancy rate of up to 20 %.

Synchronizing heifers is a good way to get more recipients in line with the flush cow. This way you can put in more fresh embryos after flushing the donor. You get better pregnancy results and also lower costs. Synchronizing heifers is quite simple with a PG-injection, and CIDRS can also be used to help to get cycles in line. About 70% of the synchronized heifers 'feel' good enough to put an embryo in and the

pregnancy rates are equal compared to (fresh) embryos put into heifers after a natural heat.

High health status

A lot of farmers buy in recipients. In that case, the advice is to bring them in at an early age, for example 9 or 10 months. Make sure that they are healthy, well fed and well developed. It's also important that they are free of or vaccinated for IBR and BVD as these diseases have a high impact on fertility.

Check, administrate and ask

What can you do when the results are disappointing? Take blood samples to check if the mineral value in the heifer is as you thought it would be. Also, be critical on your heat detection. Are the recipients regularly and obviously in heat? Write down the date, time and what you see, it's a fertility prediction. And of course: ask your ET-specialist. They implant thousands of embryos every year, visit a lot of farms and know exactly what the critical points on your farm are.*

* With thanks to Hans Hurkmans (Hurkmans ET) and Freek Lok (ETS-Holland)

Feeding of the recipients starts already at 10-11 months

HOKOVIT GENETICS

LEADING IN BREEDING AND FEEDING

Morningview Converse Judy

→ International fame for the JUDY'S

International fame for the Judy's as the title of this article states is an easy line for an American cow family that has done so extremely well in many different herds all around the world. The family started in the United States, but nowadays has different branches across the breed which is creating worldwide interest for Judy genetics.

Speaking to different people about their experiences with the Judy's there was one consistent line, the Judy's are giving so many farmers satisfaction and in many different types of herds. Balanced cows with perfect udders, great health traits and huge productions are just a few trademarks the Judy's excel in.

Morningview... Were it all began

The Judy's have a deep background but started to get global attention at Morningview Holsteins, Durango, Iowa, where this fantastic family was developed. When Tom Schmitt was working a sale in 1990, he came across a Memorial daughter, Walnutt-Knoll Judy. Judy was a just fresh two-year old and already expressed her will to milk. The Schmitts took her home to Morningview where she scored VG-87-USA and after great work as a brood cow she earned the status of GMD and DOM. She was flushed to different sires but it was her Aerostar daughter (Morningview Aerostar Jix VG-87-USA), who gave birth to Morningview Converse Judy EX-93-USA GMD DOM.

Morningview Converse Judy EX-93-USA GMD DOM

Heidskipster Shottle Silver VG-87-NL 2yr.
Amongst the very best GTPI Transmitting cows in the breed!!

Morningview RUW Bertha VG-87-NL 2yr.
Judy in RED! Her R&W Destry son is amongst the very highest g RZG bulls in Germany

Morningview Tstory Amaya VG-88-USA 2yr.
One of the greatest Toystory's in the breed!
Sold for \$ 75,000 to De-Su Holsteins

Morningview G Addition VG-87-USA 2yr.
Great new generations of Judy's

Converse Judy did an amazing job as brood cow with plenty of good daughters, her grandson Morningview Ashlar at Semex has been used around the world as a sire of sons and the newest generation of sky-high genomic young sires are getting global popularity.

Tom Schmitt: "Judy was 15 years ahead of her time from a health trait standpoint. They had fantastic udders and were problem free cows, later when health traits came out they confirmed what we had always credited the Judy's for. The Judy's are an easy cow family to work with due to their tremendous udders and they just really thrive in any operation. One of the best Judy's ever calved in at our farm is Morningview G Addition VG-87 2yr., with GTPI +2084"

Tom Schmitt
Morningview Holsteins
"Judy was 15 years ahead of her time from a health trait standpoint."

Speaking about popularity, the Judy's have been making spectacular prices on different auctions around the world with Morningview Tstory Amaya VG-88-USA as the high selling lot when she sold in the Morningview Tribute to Converse Judy Sale in 2009. Amaya was the successful purchase of De-Su Holsteins at the commanding price of \$ 75,000! This is a really strong branch of the family going back through Oman, Mtoto and Gibbon on Judy. Again a proof of the Global Fame is the Earnit sister to Toystory Amaya at Majestic Holsteins in Northern Ireland. Majestic Earnit Annette is the #1 GTPI Earnit daughter in the breed with GTPI +2269!

GOLDEN Silver – 15 x GTPI Top 10!!

We could write a whole story about this branch of the Judy's! The branch at Heidskipster Holsteins started with Heidskipster Aaron Jabber VG-85 2yr. who was imported as an embryo out of the USA. She is sired by Aaron out of a Manfred dtr of good old Judy. Everything in this combination fell at the right place and Aaron Jabber produced the best family in the Heidskipster herd ever.

Julius Kuipers: "This is the best cow family we have ever worked with. We couldn't dream that we could be so fortunate with this Aaron Jabber. She produced over 400 embryos for us of which many were exported all around the World. In our herd she delivered over 16 milking dtrs of which 12 are scoring VG 2yr. and of which all 16 are scoring VG for udder (VG-87 average). They are so consistent and excel in great type with high milk yields, the udders are a really trademark for the family.

I can describe many great dtrs of Judy with fantastic dtrs by Mr. Sam, Damion and Garter, but Shottle Silver will write the next story. She is the perfect cow for both the type breeders and the commercial farmers. Beside that she is producing the highest Genomic animals every time!"

And that's how it is, Shottle Silver is a name to write in capital Golden Letters. She has the total combination as she won the Show in Wor-kum as a Jr. Calf and later as a Fresh Jr. 2-Yr. Old with her full sister Heidskipster Shottle Selma in the Reserve Championship place. (Note: Selma wasn't tested for Genomics, but her only tested dtr, Heidskipster Planet Melinda ranks in the Top 20 GTPI Planet dtrs in Europe, US 04/11 GTPI +2269)

Julius Kuipers
Heidskipster
"This is the best cow family we have ever worked with."

For Shottle Silver, her huge popularity shot through the roof after her Genomic test came back and her capacity to breed well seems to be endless. If we look at her Genomic transmission, she is a unique cow in the World.

Shottle Silver is still Top 5 GTPI Milking Shottle dtr in Europe with GTPI +2179, a number which keeps increasing with every progeny she includes in her index!

To date (April '11), 26 dtrs of Silver have been Genomic tested already, from which she has produced the #2 & #4 Man-O-Man, the #2 Bog-art, the #3, #4 & #9 Legend, the #9 GTPI Milking Roumare, #6 & #7 Alexander, #1, #2, #3 & #6 GTPI Alino and the #1 Laurin in Europe!! With every combination she produced at least one heifer in the Top 10 GTPI ranking for their sire and including Silver herself, we see 15 Top 10 positions, that's more than 50% of her breeding opportunities!!

Angelo Pozzatti **Sire Analyst Semex**

"Europe has 2 great foundation cows out of the Converse Judy's with Goldwyn Seretta in Italy and Shottle Silver in the Netherlands. Both cows are big, powerfull cows, but very correct and balanced, with very functional udders. The best quality of these two cows is the potential to transmit huge genomic numbers on their progeny (both dtrs and sons). Seretta has 5 Baxter dtrs and 6 Man O Man's with impressive Genomic numbers for production, type and fitness. Silver has several dtrs and sons with Man-O-Man with sons testing close to 2400 GTPI"

Top 2 GTPI Baxter dtrs!

The August 2010 run was a memorable day for All. Nure Baxter Silvy VG-86-IT EX-MS 2yr., bred by Mr. Giorgio Rossetti from Italy. This Baxter dtr debuted with her Genomic index, and stood there right on top - 1st place in the European GTPI Ranking for cows!

For this fortunate branch of the Judy family we go to Italy. Here the Judy family started with Aurora Nesta EX-91-IT, the EXCELLENT Durham dtr Nesta with 7 VG 2yr. Old dtrs in Italy and a grand dtr of good old Judy. This EX-91 Durham dtr is a very durable cow, with a wonderful udder which is really productive - she produced over 100.000 kg milk in only 5 lactations. She also bred many great dtrs in Italy with an VG-88 Stormatic which won the National Show in Cremona 2005, an EX-90 Freelance, VG-88 Outside and more.

Her dtr with the most influence will very likely be La Felce Seretta VG-88-IT (s. Goldwyn), which proved a very successful purchase for All. Nure Holsteins in Italy. Mr. Rosetti from All-Nure Holsteins purchased Seretta in 2007 when she was one year old. This beautiful dairy and silky Seretta had a natural calf by Jeeves which sold to Cormdale Genetics in Canada, 5 high scoring Man-O-Man dtrs at All-Nure Farms and with the combination with Baxter we could really speak about a "Golden Cross", with 5 milking dtrs, all scoring a minimum of VG 2yr. Old in the Italian scoring system. Both, the World's #1 & #2 (VG scoring) GTPI Baxter dtrs were a result of this extremely successful cross with respectively All. Nure Baxter Silky VG-85-IT 2yr. and All. Nure Baxter Silvy VG-86-IT EX-MS 2yr., both still keeping a Top 10 position in the European GTPI Top ranking!

Sister All. Nure Baxter Silvy sold to the very international syndicate between Diamond Genetics, JK Eder Holsteins (where she is housed), and Vision Genetics from the USA.

Judy in RED

Famous as a truly B&W Family, the Judy's also have their R&W branch. Born out of the American import program of the German AI station RUW, this resulted in the R&W heifer Morningview RUW Bertha. Later on, she sold to the Dutch farm Beeze Holsteins, where she scored VG-87 2yr., placed 5th in her section at the Dutch National HHH-show '10 and has been really successful as a bull dam already with 2 Scientific Destry sons accepted by German AI stations after high Genomic tests. With many different pregnancies with RC and R&W bulls on the way, there will be a great R&W coloured future for the Judy's overhere.

Judy's with "Italian Style"

Aurora Nesta EX-91-IT

Durham grand dtr of Judy!
Great offspring including Excellent Cows & show winning dtrs

La Felce Seretta VG-88-IT

Fantastic Goldwyn dtr and great brood cow
Baxter was a truly "Golden Cross" on her!!

Have you heard of the mia's? This top-genomic family is making shock waves throughout the industry and it isn't all about numbers. The family unit hails from generations of highly productive females with Excellent udders producing peak amounts of milk.

Each generation, the mia family adds to its thriving reign. Why not add some of these highly successful genetics to your herd? Give us a call to order semen from the mia family today!

From the same family as 536H00353 Kevrel Oman Memphis!

HOLSTEIN PLAZA

www.holsteinplaza.com

Invest in the Best

SHOW TYPE • TOP GENOMICS • DEEP MATERNAL LINES

*Your
Source...*

Holstein Plaza
is the **ONLINE MARKETPLACE**
connecting farmers with elite
Holstein genetics from breeders
throughout North America!
The buying stop for dairymen
around the world!

SHIPPING

Rely on the experience of AMS Genetics to get your embryos shipped promptly and precisely to their final destination. All auction sales and export shipping will be handled through this trusted industry leader with experience shipping to all countries.

BIDDING

Bidding in the online embryo auction is safe and easy to do on the Holstein Plaza sale site. Log on to www.holsteinplaza.com and register to bid.

Born 5/26/10 – now being flushed

Over the course of the past 30+ years we have invested in and built the foundation of our Indianhead herd on the very best cow families of the breed. You may recognize these matriarchs – Triple J Mac Bev Betty (EX-94) – 1st cow of the breed to have 20 EX dtrs; BMY Leadman Karen (EX-93) – from Berkshire Valley Feather (EX-93); Inspiration Tina (EX-95). – fancy young cows just keep coming from this family; Blackrose (EX-96) – what more can we say; and a touch of Red – DRA August (EX-96) & Rachel Red (EX-94) – the best of the "reds"! And we can't overlook dtrs. of Elegance (EX-96), Ashlyn (EX-96), Paradise (EX-96) and Royal Rosa (EX)!

And...in 2002 we decided to seek and find the best heifer we could purchase. We found Sky Mae at Mayerlane - Skychief x Lead Mae. What an exciting branch of the Maes developing here. Fancy, fancy type, long lasting & big production.

Wow!! This family even has "Genomics" - Exciting stuff at Indianhead!

If attending the R&W National Convention July 20-July 23 - give us a call - we would enjoy showing you Indianhead!

Pontiac, Illinois

Interglobe Genetics is one of the nation's most well respected bovine semen collection centers. Located in Pontiac, Illinois, we are committed to providing the most dependable, professional service in the industry. Your animal's health, reproductive performance, and care are our primary goals. Our facilities are design to accommodate the housing and collection of bulls for both domestic and international owners. Our services also include the storage and shipping of semen internationally or within the U.S. Visit our web site for more detailed information, or send us an email. We have programs to fit everyone's genetic goals.

International collection barn

The international and CSS barns house bulls for collection to various countries including the European Community, Australia, Canada, Mexico, and New Zealand.

Domestic collection barn

This is our main barn for housing and collection of semen for domestic use. Many of the stalls have the convenience of an outside run, for the bulls comfort.

Office, lab and semen storage

The Interglobe business office, laboratory and semen storage are housed in this facility. The Interglobe staff provides dependable, professional service to customers by offering semen storage, shipping, AI supplies, and more.

Round barn with sign

Built in 1918 the round barn at Interglobe Genetics has become a symbol of the business. This barn is on the list of National Historic Sites and is one of the few barns of its kind left in the country.

#6 GTPI Cow of the Breed 4/11

AMS Genetics has 29 years experience in the sourcing and exportation of Holstein embryos to the World.

Although many things changed over the 29 years, one thing is still a constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need.

If you are looking to purchase embryos to introduce new genetics into your AI Company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasis your selection criteria, so we focus on the genetics that will do the best job for your goals.

Services:

- Sourcing and locating Embryo Donors
- Herd Visitation Selection Tours
- Contracting of Donors
- Complete Coordination of: Embryo Recovery
- Health Certification & Documentation
- Inland Assembly & International Shipment Insurance
- Housing & Management Assistance for Cattle housed in the U.S.
