Dam:
Stantons Freddie Cameo VG-85

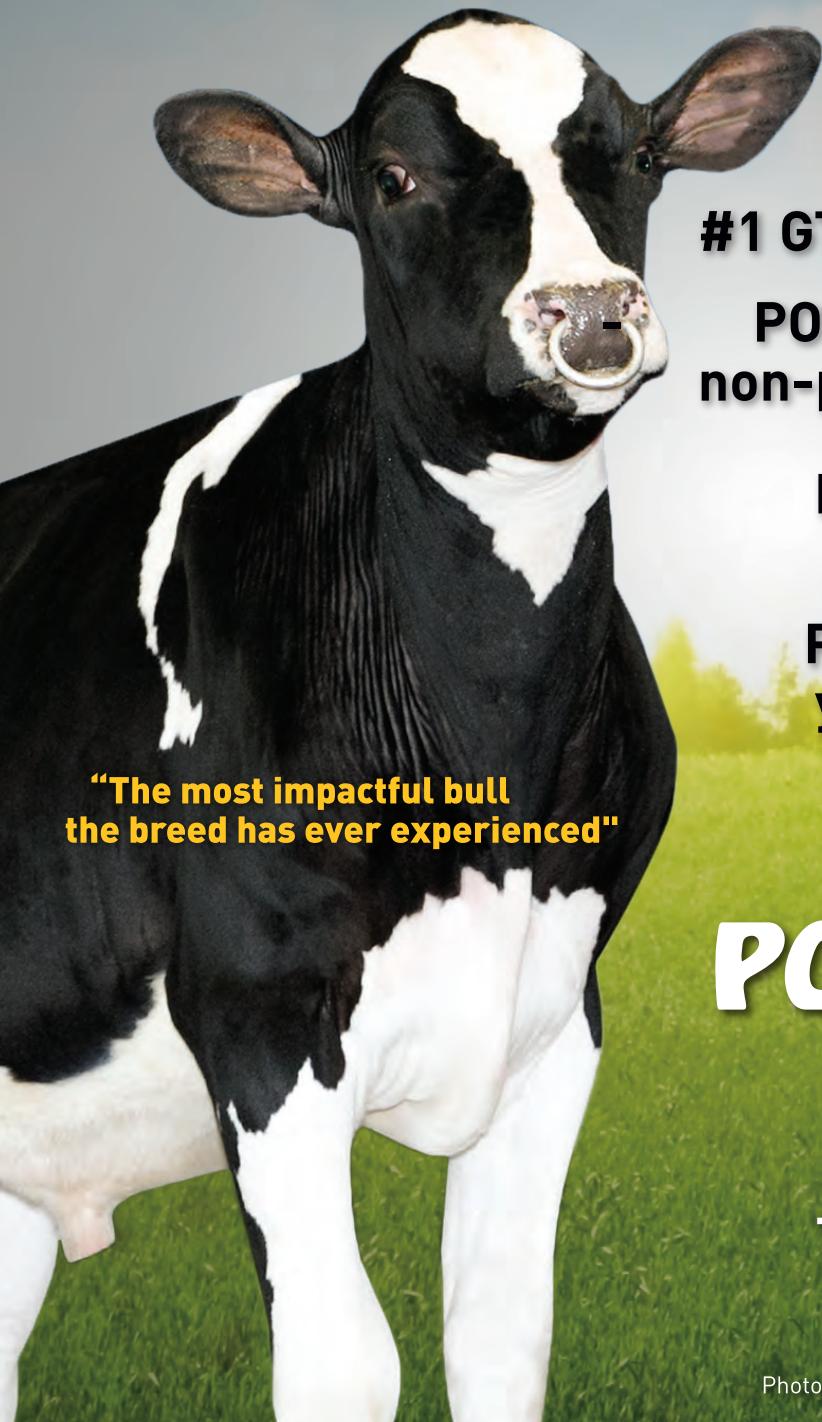

Granddam:
Stantons Lucky Cameo VG-89

Stantons CASUAL and JK Eder ERICE are respectively the #1 sons from Epic and Explode in the German top list. CASUAL comes from the extensively used Freddie daughter Stantons Freddie Cameo VG-85, one of the highest cows for gTPI worldwide, who already has produced many high genomic offspring. Besides the high milk yield and protein component from CASUAL also the excellent udder transmitting, the great values for longevity and daughter fertility stand out. His pedigree is free of Goldwyn, Shottle, Planet, Bolton and Jocko Besne. ERICE comes, with the full sister to Guarini as his granddam also from a successful cow family. His dam JK Eder Ricky 1 VG-88 is one of the top cows for gNVI in the Netherlands. ERICE represents tremendous productions with positive components, excellent udders and a good longevity as well as calving ease.

Dear Readers,

Welcome to the new Hotspots.

Welcome to the latest edition of Hotspots.

I am writing this column from the ICAR/Interbull conference in Berlin. An interesting week where we have heard all kinds of new technological developments from different points of view coming from all over the world. So many scientists working on a day to day basis to see how genetics can contribute to improved dairy farming worldwide. It will be interesting to see how these new developments and analysis will be fed back into our breeding industry. Topics like the new haplotypes, the Interbull-GMACE-Snip exchange discussion, further developed breeding values, feed efficiency and many more. Let us hope information on these new techniques stay widely available for dairymen across the world. Any new developments and data should not result in monopolies for a very few conglomerate companies controlling our breeding industry, limiting the possibility to compete.

The Hotspots team hopes you enjoy reading this issue of Hotspots containing the latest index news, articles on the best cow families and newest trends.

We also look forward to see many of you at the Holland Masters Sale, due to take place on June 27th or any of the other great events and summer show that are scheduled for the upcoming season.

Best regards, The Hotspots-team

HOLLAND MASTERS SALE 2014

Friday, June the 27th 2014 | Zwolle, The Netherlands
During the NRM (Dutch National Show) 2014

*G*reat offering, some examples of the animals selling.

*F*rom the Apple's

The Apple-family is getting HOTTER & HOTTER! A beautiful Aikman with GTPI +2219 sells from the show winning Detox daughter BTS Gen-I-Beq Avea Red, going back on the Apple's

#2 Willpower - GTPI +2433

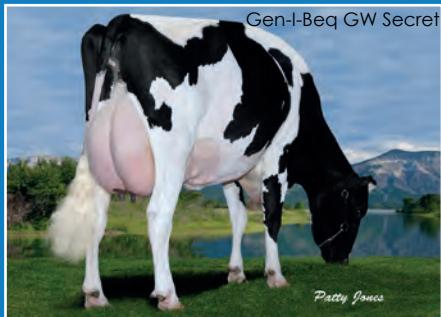

The World's #2 Willpower dtr sells! GTPI +2433 / PTAT +3.30 and has 3 brothers at Semex already! From the stunning Caps Mairy cow family.

*W*orld Class Polled - Chevrolet

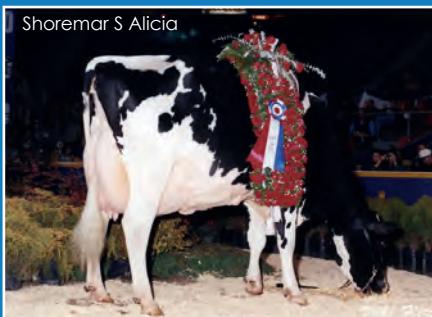

POLLED Chevrolet x Bookem x Mr. Sam! No Lawn Boy in the pedigree and huge numbers! GTPI +2303 and RZG 146. One of the hottest Polled heifers on the planet!

*H*omozygous Polled & RC

One of the highest Homozygous Polled heifers will sell! GTPI +2093, PP & Red Carrier Earnhardt going back on Gen-I-Beq GW Secret VG-87-CAN 2yr. (3rd dam)

*F*rom the newest EX-95 point cow *R*ed & special opportunity

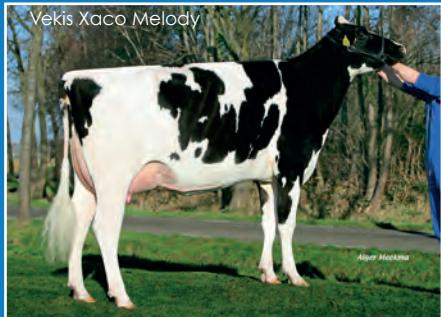

A fancy Gold Chip sells from the World's newest EX-95 point cow, Smiddiehill Alanya EX-95 x EX-90-USA Durham x Shoremar S Alicia EX-97! Same family as ATWOOD!

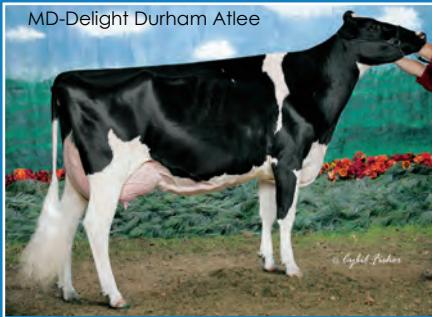

RED Fraiko dtr from the sister from Planet Silk EX-90-USA! Also from the Splendor's, a GTPI +2361 Flush age Supersire x Freddie x Bolton x Dundee x Durham x Splendor!!

*2*320 GTPI Polled & very different

Europe's #4 GTPI Polled heifer sells, GTPI +2320! Polled and RED CARRIER Kanu x Sudan x Xacobeo x Caps Mairy 4. Different polled pedigree! Fantastic opportunity.

*T*ype & index from the Atlee's

A tremendous opportunity from the Atlee's, where type meets index! A GTPI +2392 Chevrolet x Observer x Baxter x Goldwyn Abigail EX-91-USA, full sister Atwood

*P*olled & RC Tango from the Barbie's

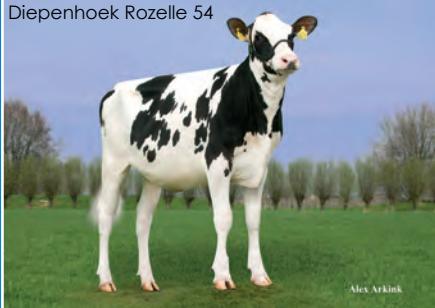

Brescia was Champion heifer @ Beilen en Best Red at the National HHH-show '13. Her POLLED & *RC TANGO sells with GTPI +2194 / PTAT +3.31! Great POLLED opportunity

*O*RDERT YOUR SALE CATALOGUE THROUGH :

Rozelle 54 sells - #1 GTPI cow

Diepenhoek Rozelle 54

Rozelle 54 SELLS fresh, with her POLLED & RC Kanu P dtr and Tango & Jibir preg! She is the #1 GTPI cow in Europe and #5 World Wide, has 4 sons and dtrs over 2500 GTPI til date

Red from the Tony Beauty's

Rainyridge Talent Barbara

Beautiful RED Destined heifer, one of the highest RED heifers for GTPI in Europe, 2 brothers @ Semex already, out of the Rainyridge Tony Beauty cow family.

The best from the Larcrest's

Neerduist Uno Cherry

Neerduist Uno Cherry is a very early Numero Uno x Planet x Larcrest Cosmopolitan. Cherry's Jetset sister and GTPI +2370 Supersire dtr are selling!!

Supershot is super hot

Rose Super Shot

Buy Supershot's sister through this ultra interesting 1st Choice King Boy from Super Shot's dam: Rose Super Shot VG-86-NL 2yr. , the #5 GTPI cow in Europe! Maximum potential

Mc Cutchens x Snow Carrie

MS Chassity Snow Carrie

A Mc Cutchens dtr sells from MS Chassity Snow Carrie VG-88-CAN 2yr., sold for \$ 100,000, followed by Chassity EX-92! Same family and sire as Capital Gain & High Octane

Get the new #1 GTPI heifer

Muri Planet Poppy

Unique opportunity in Europe to get in the Genomic drivers seat, 1st choice from All. Nure Uno Pepita (GTPI +2554 / NM \$ 929 / PTAT +3.26). Once in a lifetime opportunity

Commander's full sister sells

Larcrest Cale

Commander is one of the hottest flush bulls in the breed at the moment. He is a Mogul son from VG89-2yr Larcrest Cale's full sister and his full sister sells!

Huge RED CARRIER opportunity

Holbra Manoa

Telgter Aikman Doreen *RC! The #2 GTPI RC heifer with GTPI +2351, gPFT +3010 (#1 RC gPFT), RZG 148 and 370 gNVI (RW)! Aikman x MOM x Mascol x Durham x Prudence fam.

#3 RZG RED Heifer sells

Caps Angela 1 *RC

The World's #3 RED RZG heifer from 2014 sells! RZG 156 Fageno from the American Felder Den Barb Cindy cow family. 9 EXCELLENT cows in her pedigree.

Visit the National Show and Holland Masters Sale

Come to Holland for a great experience, the NRM (Dutch National Show) is one of the hot days on the International Dairy event diary. Tours will be organized from different countries to this event. Visit www.hmsale.nl for more information.

Kevrel Shottle May

Index, Type and Multiple Generations of Bull Dams

They show up high on the charts and some of the finest daughters of international popular sires like Shottle, Snowman, Jeeves and Observer descend from this family. The spotlight cow of this article is Kevrel Shottle May Excellent-93 DOM.

Kevrel Shottle May Excellent-93 DOM descends from a deep pedigree with multiple generations of bull dams and great brood cows. Many of these cows marked the periods in which they were active. Today, the cow family has spread across the globe and several descendants are likely to start their own legacy.

To further illustrate, this family produced the No. 2 gRZG Freddie son, Franklyn at Masterrind, with an impressive gRZG of +145. Also one of the highest homozygous polled proven bulls in the breed, Ostretin Magua PP *RC and one of the highest polled flush-age heifers, Pine-Tree 4890 Casta 5660 *PO with a GTPI of +2304, owned by Pine-Tree Dairy, Ohio, U.S.

From the start

The connecting link to all the exciting animals mentioned above is the Gold Medal Dam and Dam of Merit, Da-Net Angie Leadman Excellent-92 2E.

"This is our best homebred family extending back to when my dad started dairy farming in the 50s. The family always gives loads of milk with consistently wide, beautiful udders. Our first A.I. contract ever was on the Shottle May's third dam, Da-Net Angie Leadman Excellent-92 2E."

Angie Leadman had several good daughters, but the line from May's granddam, Da-Net Patron Pansy, is the most dominant. Unfortunately for her owners Pansy didn't flush very well as a young cow, but this didn't withhold her from producing a few very successful daughters. The Manfred daughter, Brandt-View Manfred Miss Very Good-88 is the dam of the popular proven bull Brandt-View Munster CRI and is also the brood cow behind the successful homozygous polled bull, Ostretin Magua PP *RC.

But the flush to BW Marshall was arguably the most successful, leading to Brandt-View BWM Wendy-ET, who is the brood cow behind the high flush-age polled heifer, Pine-Tree 4890 Casta 5660 *PO and Brandt-View BW Marsh Mia Excellent-90 DOM.

The Mias

The other very successful BW Marshall daughter, Brandt-View Marsh Mia Excellent-90 DOM has proven herself to be a brood cow of the highest standard. Kevin Leaverton owner and breeder of Kevrel Holsteins and Shore Genetics, a private A.I. stud that markets semen worldwide, purchased Mia.

"At the time we did a lot of embryo business, and we really liked the

Daughter of Kevrel Colby Missy EX-90 EX-MS

Leaderwin Iota Monday VG-87-2YR • GTPI+2320
One of the highest GTPI milking Iota daughters in the U.S.

Leaderwin Observr Memory VG-88-2YR • GTPI+2177
High scoring Observer daughter direct from Kevrel Shottle May

Leaderwin Observr Maranda VG-86-2YR DOM • GTPI+2371
No. 1 GTPI Observer daughter in the U.S. (4/14)

family so we decided to purchase her privately as a heifer from breeder, Daniel Brandt," explains Leaverton.

Unlike her mother, Mia flushed extremely well as a young cow and the lines developed from Mia continue today to be great flush cows according to Leaverton.

Kevin Leaverton, Kevrel/Shore

"Besides the good fertility on the female side, the bulls from this line are also very good semen producers."

"At the time we were working with a breeder from Denmark that contracted Mia for three flushes and the bulls were selected. Shortly after the flush to Shottle, communication with the breeder became non-existent and none of the embryos sold. It ended up working out very well for us in the end, we got two pregnancies and two females, Kevrel Shottle Mia Excellent-93 and Kevrel Shottle May Excellent-93 DOM," Leaverton shared.

Leaverton developed many more successful lines from Mia. Mia has Very Good daughters by Oman and Jetstream and Excellent daughters by Colby, Modest and Morty. While the Shottle line is the most popular, for Leaverton the line developed from the oldest daughter of Mia, Kevrel Morty Mia Excellent-90 has been their most profitable. "We have had a lot of success with this line, especially with Morty Mia's son Memphis." Sired by Oman, Memphis is the proven bull available through Shore Genetics with a GTPI of +2046.

Shottle May

The story of Kevrel Shottle May Excellent-93 DOM, started when Steve Lantz, Leaderwin Holsteins, visited Leaverton to look at some commercial cows for his brother's expanding herd.

"While we were there looking at cows and springers, two heifers caught my eye, Kevrel Shottle May and Kevrel Shottle Mia," Lantz shared.

Lantz absolutely fell in love with May and asked for a price on the young Shottle daughter. "The price of May was a lot of money for us, we had never spent that much money on a cow." So they thought it over for quite a while before purchasing, and so the story of May be-

gins. This purchase lead to the formation of Leaderwin Holsteins by brothers Steve, James and Emanuel Lantz of Pennsylvania, U.S.

Lantz recalls, "May was in heat the day before we picked her up, we immediately set her up for a flush to Bolivia, resulting in the first May daughter at Leaderwin, Model, and her brother went to A.I." Today, the offspring is divided up between the Lantz brothers who each have their own farm near Leola, Penn.

Both James and Emanuel are extremely pleased with the offspring. Emanuel shared, "I really like the udder quality and the ease of keeping, they never have problems and continue what they do best, producing milk with great components."

Steve Lantz, Leaderwin

"I really like the production and the great type that comes with every generation. This family breeds so consistently and they always produce animals that will develop into VG and EX mature cows."

Shottle May who will be eight in October still holds an impressive +2166 GTPI. She has easily proven herself to be a phenomenal brood cow at Leaderwin with 13 Very good and one Excellent daughter to date. Scored Excellent-90, Leaderwin Jeeves Mace is one of the earliest daughters of May. Mace is currently the No. 2 GTPI Jeeves daughter in the breed and is following the footsteps of her dam with several high testing daughters and granddaughters. Mace is also the dam of the highest testing bull of the family, Leaderwin Muscadet, a GTPI+2535 Mogul son at Semex. Probably the most well known daughters of Mace are those sired by Observer and Domain.

From the Observer daughters of Mace, Leaderwin Obsrvr Maranda Very Good-86 is the highest indexing with a GTPI of +2371. Maranda is the dam of the No. 1 and No. 2 GTPI Lexor daughters in the breed, Manga GTPI+2509 and Marlene GTPI+2465. While Maranda's Superstition sister, Leaderwin Super Magical Very Good-86 is the dam to the No. 4 GTPI Lexor daughter in the breed, Leaderwin Lexor Manda GTPI+2451. Maranda also has high testing daughters by Supersire.

Another popular daughter of Mace is the No. 1 GTPI Domain daughter in the breed, Leaderwin Domain Mist Very Good-87 who sold for

Frank Regan, Regancrest Farm on Kevrel Shottle May

"She is one of the best Shottle daughters I have ever seen. She has a tremendous udder and great frame. She was just a two-year-old the first time I had seen her, scored Very Good-89. She was the kind of cow that had the look, pedigree and genomics."

\$159,000 to Elite Dairy Genomics, Illinois, USA. Mist has three clones owned by Oakfield Corners Dairy, New York, U.S. and Leaderwin. The highest GTPI descendant of the May family is a direct daughter of Leaderwin Domain Mist, EDG Mist Uno Mylife with a sky-high GTPI of +2564. Mylife is owned by Butz-Hill, Elite Dairy Genomics, Don Barry and TJR Genetics, Iowa, U.S. Mist also has high testing daughters by Earnhardt and Latimer while her clones have high daughters by Doorman, Halogen, Johnson and Cabriolet.

A third daughter of Mace with high offspring is Leaderwin OStyle Mistake, who has three high testing daughters by Miles including one at +2438 GTPI.

May's highest daughter, Leaderwin Snowman Mystery, the No. 2 GTPI Snowman daughter, is owned by Regancrest Farms. "Unfortunately we were not successful in acquiring May herself, but fortunately we were able to buy a choice through one of our Command Performance Sales, that choice was Snowman Mystery," shared Frank Regan, Regancrest Farms, Iowa, U.S.

Regan admires Kevrel Shottle May, "She is one of the best Shottle daughters I have ever seen. She has a tremendous udder and great frame. She was just a two-year-old the first time I had seen her, scored Very Good-89. She was the kind of cow that had the look, pedigree and genomics."

Mystery has already proven herself to be a great young cow that transmits extremely well. She has a Predestine daughter with a GTPI of +2502 and two sons who just came back with results; a Jacey at +2471 GTPI and a GTPI+2406 polled Ohio Style. Mystery will be pictured and scored in June and is currently on an IVF program. Regan shares, "We also have young March 2014 Goldwyn daughters here from May herself as a result of IVF."

Comparable to her daughter Mace, Observer and Domain also worked very well directly on May. The Observer sisters Leaderwin Observer Matti Very Good-85, Leaderwin Observer Mary Very Good-88 and Leaderwin Observer Memory Very Good-88 have been very popular donors. Woodcrest Dairy, New York, U.S. now owns Matti and she has

a +2408 GTPI Snowmobil daughter at Daisy Farms, Texas, U.S.

Leaderwin Observer Memory was a very popular donor at Leaderwin with several embryos exported to Europe. Leaderwin DG Mythe with a GTPI of +2225 is a result of a successful export and was purchased by Aghavilly Holsteins, Scotland on the Eurogenes Online Heifer Sale in November. Mythe is one of the highest Lithiums in Europe.

"We liked the consistency of this family, and the fact that they had not previously been available in Europe. After our agent had been on a trip to the states, we saw some snapshots of several family members and were impressed with the dairy strength of the older cows and the style of some of the milking heifers. They have also bred well, creating some interesting genomic calves. Since Lithium Melody arrived, we have been pleased with her development. She is a really well balanced, stylish heifer with a great frame and very well grown for her age. She has already been flushed successfully and is again on program," shared Noel McCarragher, Aghavilly Holsteins.

From the Domain daughters, Leaderwin Domain Miracle Very Good-87 is most admired. Miracle was sold to Clayton Crest Farms, Indiana, U.S. where she has produced several high daughters. Sired by McCutchen, her highest daughter, Claytoncrest Merry Mae carries a GTPI of +2416 and is owned by Siemers Holsteins, Wisconsin, U.S.

Another mating that worked well on May was Iota. From this combination, developed one of the highest Iota daughters in North America, Leaderwin Iota Monday Very Good-87 with a GTPI of +2320.

From the non-milking daughters of May, Watermolen Supersire Marijke is one of the highest and was the first direct daughter of May in Europe. Marijke scores +2336 GTPI and will be on a flush program this summer at Watermolen Holsteins, Netherlands.

Kevrel Shottle May offers what many breeders worldwide are looking for at the moment, high genomics backed by a deep pedigree and a great sire stack. This ideal combination has created a very profitable line for breeders worldwide and the impact of this family is only beginning as the popularity for the Mays continues to grow.

- Reserve Grand Champion, Georgia National Fair 2013
- HM Intermediate Champion, BC Spring Show 2013

cellent-93 Durham followed by an Excellent-95 show-winning Leader. 2331 was the high seller at \$20,000 on the Tramilda & Select Consignment Tag Sale in 2013. A consignment from Phoenix, T&L Cattle and Kingsway, 2331 was the successful purchase of the sale hosts and stayed at Tramilda Holsteins.

Breeder Comments: Austin Yoder: "2331 is a

great everyday cow to work with. She is the epidemic of a balanced dairy cow and certainly has done everything we expected her to do in developing thus far. 2331 is currently housed at Budjon Farms, Wisconsin for the summer and fall show season. We are also very excited for her Goldwyn daughter to be born next month (June 2014). We feel 2331 is just getting started and the best is yet to come!"

Story: Reserve All-Canadian in 2013, Grendel is fresh again for the 2014 show season and looks fantastic. One of many Excellent-95 cows developed at

GERANN ROY GRENDEL | EXCELLENT-95-CAN 95-MS

- Reserve Grand Champion, Ontario Spring Discovery 2013

Quality Holsteins, Grendel was acquired by this master breeder in October 2011 and has been a part of their show team ever since. Grendel is a Royleane Jordan daughter from a Goldwyn and has daughters by Aftershock and a Windbrook due as a milking yearling this fall at Quality Holsteins, Ontario, Canada.

Breeder Comments: Ari Ekstein: "Grendel is definitely one of Quality's favorite cows. She is a tall stylish long dairy cow with a tremendous will to milk. Grendel placed second at last year's Royal Winter Fair fresh 14 months. We dried her off following the show and she is fresh again since the middle of March. We believe that she looks the best she ever has and we have high expectations from her this year."

Story: With her recent score of Excellent-94, Style SA Jumpn4Joy-Red looks to have a big year! Jumpn was scored for the first time at just two weeks fresh as a five-year-old. Jumpn has already had great success in the show ring, both as a heifer and in milking form. She placed second as a Senior Two-Year-Old in the Red and White Show at World Dairy Expo in 2011, and was recently named Junior

- 1st Fall Yearling, Midwest Spring National R&W Show 2010
- Junior Champion, Midwest Spring National R&W Junior Show 2010
- Reserve Junior Champion, Midwest Spring National R&W Show 2010
- 6th Fall Yearling, Grand International Red & White Show 2010

All-American Red and White Four-Year-Old in 2013. Jumpn is ready for the 2014 show season!

Breeder Comments: Allen Van Gorder: "When I saw St-yel SA Jumpn4Joy-Red EX-94 show as a Senior Two-Year-Old at World Dairy Expo and place second only nine days fresh with her first calf, I knew in a calf or two she could be incredible. Jumpn was bought in fall 2012 as a three-year-old and went on to become the Junior All-American Four-Year-Old last year.

She looks amazing, and we hope to rescore her again in several months. We are very excited to have around sixteen pregnancies from her by Redburst, Heztry, and Windbrook due in September. Jumpn was purchased because she not only looked amazing and had great potential, but she also comes from a great breeding cow family. She has several sisters also nominated All-American, and around 27 Red and White nominations from the family. We can't wait to see what Jumpn can do this year!"

CHOOSE YOUR FAVORITE European or North American SHOW COW

Story: One of the very best young cows in Europe. She was 1st in her class at the most recent Swiss Expo in Lausanne and after that sold to Scholten Dairies from the Netherlands where she got the

SWISSLOR DAMION LORIA | 89 87 89 89 / VG-89-NL 2YR. (MAX)

Frozen IVF Embryo

Pregnancy Rate: 50%

The interest in IVF is growing worldwide. In the rush to produce the best genetics first, it's no wonder IVF has increasingly become a perfect way to speed up generation interval and offspring production. Techniques and pregnancy rates also continue to improve for implanting frozen IVF embryos. Hotspots provides an update.

Can IVF embryos be frozen? It is a frequently asked question. In the beginning, the IVF technique was only possible for implanting the IVF embryos fresh into recipients. As an increasing number of breeders worldwide use IVF to multiply the offspring of their best animals, the number of requests to freeze IVF embryos continue to grow. Techniques have improved, so the answer to the first question regarding the ability to freeze IVF embryos is yes. Hotspots asked Hans Hurkmans, owner, Hurkmans ET and Dr. Mark Allan, Director of Marketing and Genomics, Trans Ova Genetics what their experiences, advice and viewpoints are.

IVF is popular

The benefits of IVF were again demonstrated to ET specialist Hans Hurkmans last month after the release of Cogent Supershoot semen. "With one straw we recovered 51 oocytes from six different donors and were able to make 23 good embryos." A small message on Facebook generated further breeder interest and Hurkmans did another session a week later.

Hans Hurkmans, Hurkmans ET

"Although the semen is expensive, with IVF we are able to divide the costs and get good results."

Mark Allan with Trans Ova Genetics also notices that the number of IVF sessions continues to increase. "We have seen steady growth the last six to eight years. It's becoming a procedure of choice for many clients. They see advantage to getting embryos out of pregnant cows and heifers since IVF can be done between 40 and 120 days of gestation. It's also an advantage if you want to make sexed embryos, as IVF sexed semen options work well."

Only freeze the best quality

All the IVF embryos Hurkmans collected in the session with Supershoot were freshly implanted a week later. "When you want to have the highest pregnancy rates, you need to implant fresh," Hurkmans says. "It's similar to embryos collected with 'normal' embryo transfer, you get the best results with a fresh implant to recipients."

Nevertheless, the results with freezing IVF embryos and putting them into recipients at a later time are good as well, are Allan and Hurkmans' experience.

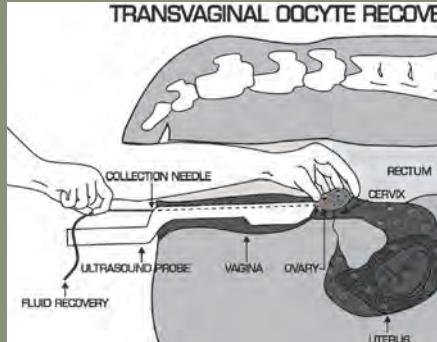

According to Hurkmans, "It all starts with classifying the embryos in the right way. Only the best, first grade, IVF embryos can be frozen. The second grade IVF embryos are best put in fresh." For Hurkmans this is a basic rule in his company while working with IVF embryos. "It's a guarantee that the embryos are of the highest quality after thawing. If these frozen IVF embryos are sold, the buyer gets the highest chance for pregnancy."

Compared to conventional embryos the IVF embryos look the same to the eye, maybe a bit darker, but are morphologically the same. As IVF embryos are developed in a lab, they are more vulnerable. It is important to do everything right and with care in order to get the same results as conventional embryos. Hurkmans assures that the pregnancy rates of IVF embryos are competitive. "First grade embry-

Hans Hurkmans, Hurkmans ET

"It all starts with classifying the embryos in the right way. Only the best, first grade embryos can be frozen. The second grade IVF embryos are best put in fresh." For Hurkmans this is a basic rule in his company while working with IVF embryos. "It's a guarantee that the embryos are of the highest quality after thawing. If these frozen IVF embryos are sold the buyer gets the highest chance for pregnancy."

photos and charts courtesy of ©TransOva Genetics

os and fresh implanted IVF embryos have about the same pregnancy rates since you only freeze the very best; and the lower quality has the best chances after being implanted fresh. When you freeze second grade IVF embryos the pregnancy rate drops to 35 to 40 percent, whereas with conventional embryos the pregnancy rate doesn't drop as dramatically." Hurkmans advises to be very critical in both freezing and buying IVF embryos. "They are too expensive to take a risk, implant fresh if you have any doubt about the quality. If you buy IVF embryos, make sure the IVF lab has a good reputation," says Hurkmans knowing that IETS, the International Embryo Transfer Society has clear criteria about the classification of the embryos. "It's all about faith and staying independent. The commercial pressure can be huge, but as a technician you have to stay professional."

No difference ET and IVF

Allan agrees on freezing only the very best. "With in-vivo you can freeze grade one and two, with in-vitro you only freeze grade ones and the best of the grade twos." Trans Ova Genetics is very selective on the quality of embryos that are frozen. "Embryos that do not qualify for freezing should be transferred fresh."

The pregnancy rates are just slightly lower.

Dr. Mark Allan, Trans Ova

"Minus 5 percent, but in individual cases we have the same pregnancy rates with frozen ET and IVF embryos." Pregnancy rates average between 45 and 55 percent for frozen and fresh implanted IVF embryos. "There is not a lot difference. With ET most pregnancy rates fall from 50 for frozen and 60 percent for fresh implanted embryos."

Allan emphasizes that recipient management is extremely important. "It's about little pieces, everything should be right: nutrition, heat detection and housing."

Freezing medium

Hurkmans has put a lot of emphasis on finding the right media for freezing the IVF embryos. "It's an extremely critical factor in getting as many pregnancies as possible." After a conventional flush the embryos will be frozen in an ethylene glycol solution. Thawing is done in a 'one-step-method'. "This procedure doesn't work for IVF embryos. It's better to use glycerol as freeze medium," says Hurkmans. "The disadvantage is that implanting is a bit more complex and takes more time and a specialist. The embryos have to be thawed under the microscope, the advantage is that you can check the quality." He is running tests with other media with oocytes from the slaughterhouse. Hurkmans explains, "We freeze in different media, thaw and then check if the embryos remain vigorous. Our goal is a one step-method thawing and the same or better pregnancy rates."

Is there a possibility to increase the pregnancy rates of IVF or ET embryos in the future? Allan responds, "We keep improving all technologies, but to reach higher than 60 percent will be difficult. But it's a possibility. Compare it with regular A.I., you'll notice there is not a lot of difference in A.I. or implanting embryos in the dairy industry." That's why he sees increased interest to get advanced reproductive techniques, including embryos, in combination with genomics at the commercial level of dairy production. "With genomics you can find the elite animals in your herd for TPI and Net Merit use these cows as embryo donors and implant the embryos in the lower genetic rank females. This allows one to capture both the superior male and female genetics and make genetic change at an accelerated pace," he describes enthusiastically. "A hand full of farmers are just beginning to harness the power of embryos and genomics, I see a lot of potential for a wider adoption of our technology and increasing the long-term profit for dairy farms in all segments of the industry."

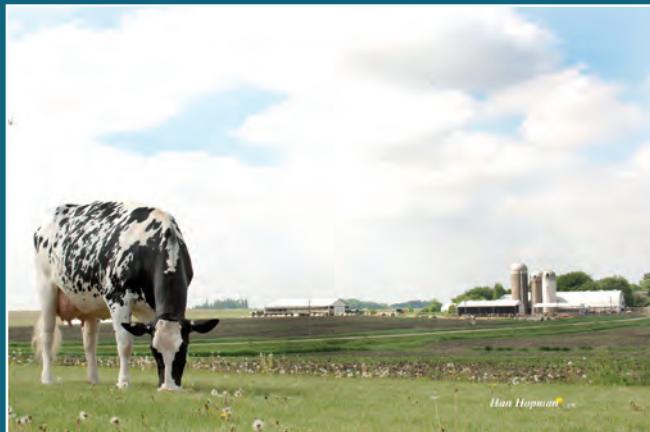

| Pregnancy rates (%) IVF Embryos | Fresh | Frozen |

# The Bertaiola Lidia's

## Beautiful type, high genomics and... different bloodlines!

In this Hotspots we dive into the Bertaiola Lidia's. A well performing and respected deep Italian cow family, known for their stunning type and awesome udders. Thanks to high genomics and an outcross pedigree the Lidia's came to bloom in the Netherlands. "Ideal cows for the modern dairy breeder."

"It was in 1986, I think we were 16 or 17 years old. We just started to get passion for show cows and knew a bit about type and genetics. Our father gave us a free hand in buying Ronchi Mars Pamela at a sale. She was one of our first show type cows in the herd." Guiseppe Beltramoni can still remember how he and his family came into the Bertaiola Lidia's. "She was about 1000 euro more expensive than the average on that sale, but it was worth every cent." Pamela was for the Beltramino's the start of breeding their own strong cow family with high 'farmers satisfaction' that came -thanks to high genomics- in the picture of all major AI-centers in the world. The first feat of arms: Mincio, sired by Bolton, the number 14 in Italy with 2.92 for type and more than 4.0 for udders. And there is much more to come.

### Eyecatchers in the barn

Pamela was without a doubt a good catch. She scored 91 for type and was for a long period the eyecatcher in the barn. "She had the peak in her career in 1988 when she became reserve grand champion on our regional show", Guiseppe remembers. "The grand champion at that show was Alpag Chief Millymilk, the mother of Boss Iron." The Semenzoo sireanalyst laughs. "He is the bull that played a key role in

the further development of the Lidia's."

In combination with Inspiration, Pamela delivered Pamy who scored VG 85. "She lost one quarter and never could become excellent, but in potential she had huge show talent." The best thing Pamy did was to give birth to Mark Susanne, sired by Chief Mark. "She became grand champion on our provincial show and was nominated to represent Italy on the European show in 2002 in Brussels", tells Guiseppe about the VG 89 cow. What else could you wish for in a cowfamily? Guiseppe knows the answer: Bel Astre Unforgettable, the daughter of Mark Susanne. "The Astre was also an extreme producer. For a long time she was by far the best in our barn for production in milk and protein."

### *A hot cow family was born, thanks to the high genomics and the outcross pedigree*

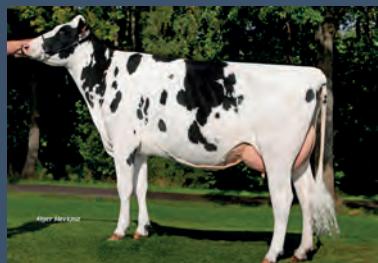

With EX-91she also continued the tradition of high type. "Her udder was tremendous", Guiseppe remembers. "On shows she always won the prices for best udder." Unforgettable was flushed several times, among others with Mtoto. It resulted in Bel Mtoto Elisa VG-85, the mother of the excellent Bel Iron Irene EX-90. Irene has 5 sons in AI, under which 2 Bolton sons, one of them is Mincio.

### Cow for modern breeders

Mincio can be found in the Semenzoo barns and is one of the best Bolton sons worldwide. "An easy to sell bull", describes Semenzoo

Bertaiola Alx Lidia

**RZH Snowman Lynn**  
Snowman x Alexander - offspring with huge numbers

sireanalyst Giuseppe Mincio "If I show customers 15 to 20 Mincio daughters, they are convinced of his qualities. He is extremely consistent." Beltramino notices that the Bolton son with 2049 PFT was selected before the genomics era. "He was selected on his pedigree index, and specially because of the quality of his cow family."

The breeding power of the Lidia's is extremely recognizable in Mincio's offspring. "He is siring the kind of cows modern breeders are looking for", experiences Beltramino. "Wide, strong and long lasting cows with beautiful, beautiful udders." Mincio's are an example of dairy strength with wide rumps, wide rear udders and a wide front end. "Despite of that the cows have a very feminine head and a long smooth neck. Refine dairy character with enough strength and average size. The ideal cow, with not to extreme production, for the commercial breeder."

## Mincio's sisters

In the time Bolton became popular the AI's were searching for the best daughters. Jan de Vries of Diamond Genetics was on holiday in Italy and -off course- spent a few days seeing cows. "Bolton was used

**Giuseppe Beltramino**  
**"The genomics confirmed what we already knew about the cow family"**

a lot in Italy and especially on the better cows." When he visited the Bertaiola farm and saw the heifer sisters Lidia and Serena, both sired by Bolton, he was impressed. "They came from a deep cow family, had Mtoto and Boss Iron in the pedigree. That was rare at that time, while specially Boss Iron got more and more appreciated thanks to the high durability and lifetime production of his daughters in combination with strong type." But which of the two would be the best? "They were both different with their own qualities. Lidia was more luxury, longer with a beautiful dairy character. Serena was stronger, more solid and maybe had a bit better legs. It looked like she was going to be a better producer while Lidia had more style. I just couldn't choose."

Remember, it was just before the genomic era. Jan knew that the heifer with the highest genomics would become most popular. But he didn't have the time to test the genomics, the heifers were about to calve and he had to make a decision. "What if I choose the wrong one? I decided to take them both." So both Lidia and Serena came to The Netherlands and moved to dairy farmer Jan van der Ven ("I couldn't choose either, so I took them both") and calved from heifercalves from Alexander.

## High genetics

Unavoidable and fortunately, the heifers (both VG 86) and their offspring had to submit to a genomic test. It was good news: both Boltons scored high, although Lidia had better numbers than Serena and she had the talent to bring it on to the next generation. Her

Alexander daughter -Bertaiola Alexander Lidia VG 87- was the #1 Alexander in Europe. A 'hot' cow family was born, thanks to the high genomics and the outcross pedigree. No Goldwyn, O Man or Shottle means a huge potential in making combinations for Lidia. One of the most impressive was with Snowman. Ven Dairy Lidia 4 (s. Snowman) was sold for € 40.000 to Ponderosa and Diamond Genetics. As a heifer she came back to the Netherlands at Vekis Genetics for € 25.000. Embryo's from Lidia 4 even went to Japan, she has high scoring bulls

**Jan v.d. Ven**  
**"Could easily manage 200 of those Lidia's by myself"**

at the AI and her Fanatic daughter DG Lindsay was sold to Hul-Stein for € 22.000 at the Vente Drakker. Lidia 4 her success story keeps going on as her Meridian daughter DG Lizzy is the # 1 for GLPI, # 2 for TPI, #2 for RZG and #3gPFT of all Meridian daughters. In all these placings is her high score for udder remarkable, a family trait, Giuseppe would say.

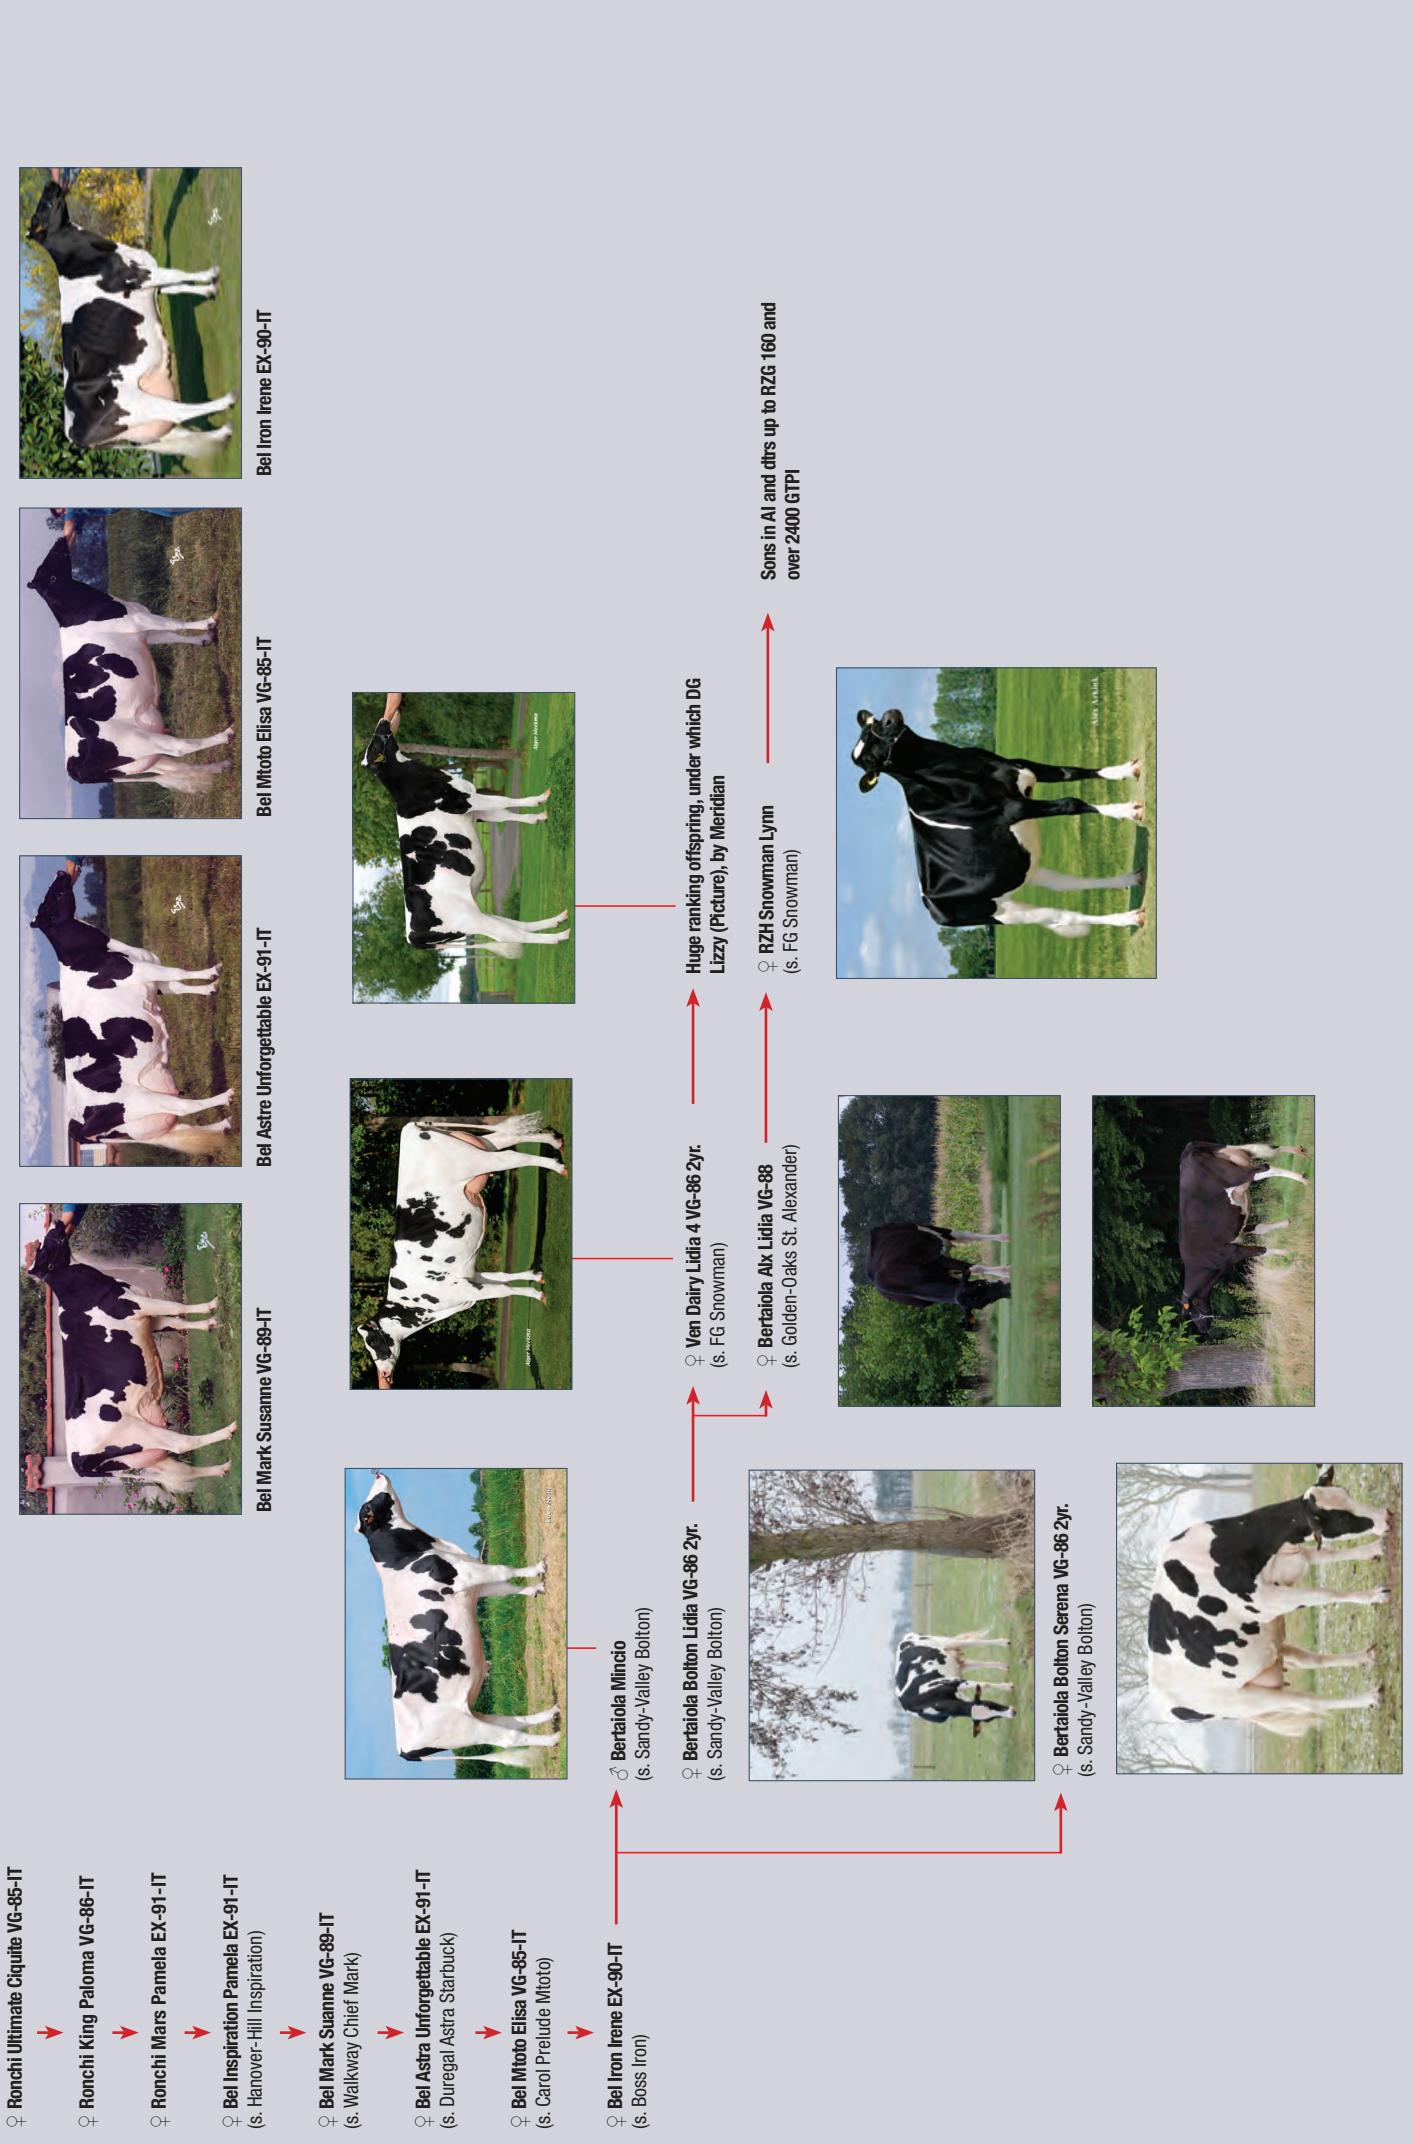

And Alexander Lidia, already in her second lactation, makes her own interesting story. She has a Snowman daughter, RZH Lynn, who is about to calf this summer at Volmer Holsteins. Lynn already has sons at different AI's and Chevrolet daughters at Bouw Holsteins (2456 GTPI) and Anderstrup Holsteins (RZG 152). Her Willpower daughter is the highest Willpower with 160 RZG. With her red factor and polled Parma PP daughter at Oosterbrook Holsteins Alexander Lidia is filling a new chapter in the book of the Bertaiola Lidia's.

## Long lasting, easy handling

Although breeder Jan van der Ven sold a lot of Lidia's -'the highest ones'- he is happy milking some in his herd. "My breeding goal is hard working cows that produce easily and last long, the Lidia's cows fit in that picture. I could easily manage 200 of those Lidia's by myself." The 'old' Lidia left the farm after losing her calf to early. But Jan got her ovaries and made some embryo's thanks to IVF. "So we still have Chevrolet calves to come. I look forward to them." Serena has calved four times (and is again in calf of home bred sire Vendairy Wonder) and Jan mentions her as a potential excellent cow. "She has a beautiful frame, is complete with good feet and legs and a stunning udder. Bolton x Boss Iron is a golden cross. It's dairy type x power."

The success of the Bertaiola Lidia's is not a surprise to their founders. "The genomics confirmed what we already knew about the cow family", Giuseppe says and adds that they only have a few family members in the barn with AI interest. "We are paying more attention in our matings to indexes, but the base is that we like to breed a complete cow with great type and the ability to make a high lifetime production."

AMS Genetics has 30 years experience in the sourcing and exportation of Holstein embryos to the world. Although many things changed over the 30 years, one thing is still constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need. If you are looking to purchase embryos to introduce new genetics into your A.I. company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasize your selection criteria, so we focus on the genetics that will do the best job for your goals.

### Services:

- Sourcing and locating embryo donors
- Herd visitation selection tours
- Contracting of donors
- Complete coordination of: embryo recovery, health certification and documentation, inland assembly and international shipment insurance
- Housing and management assistance for cattle housed in the United States

# Coyne-Farms Dorcy

## Choose your favorite DORCY daughter

Coyne-Farms Dorcy is the Very Good-87 Sandy-Valley Bolton son of Coyne-Farms Bret Daffers Excellent-91 DOM. Dorcy currently stands as the No. 2 GTPI Proven Bull for April 2014 confirming his early genomic predictions released back in January of 2009. He was heavily used as a young genomic sire and sire of sons with his outcross pedigree and tremendous genomic numbers. Now Dorcy daughters are admired for their beautiful udders and being balanced dairy cows that mature well for dairymen across the globe.

### A CAPJ Gaela

# Nitro P

588026 CVF BLF BYF aAa 432156

Alex Arkink

**Polled - Heifer bull -  
Pure protein and milk power**

**Ladd P x VG86 Redspock 2 v. Spencer 2 x  
VG86 Redspot 7 v. Talent 2**

Nitro P combines enormously high milk production with fantastic protein percentages. For conformation, we expect dairy, stylish cows with substance. He transmits optimal rumps. Besides very good locomotion, he shows outstanding figures for cell score and longevity. Heifer bull.

gRZG 145 | gRZM 139 | gRZE 119 | gRZS 117 | gRZN 116 | gRZR 101 | gRZKd 121

# Lobach

570442 CVF BLF BYF aAa 234165

Alex Arkink

**Conformation - Longevity -  
Protein percentages**

**Lexor x VG89 Noma v. Time x VG87 Nemo v.  
Stol Joc**

Lobach is one of the highest Lexor sons and a solid milk yield bull with excellent protein percentages, convincing for dairy type and body. Feet and legs as well as his udder qualities are phenomenal. Calving ease and daughter fertility are strong points. Sire of sons.
