Dear Readers,

Passion is one of the driving forces in our sector and with the 2016 show season in full swing that force amplifies. We will be able to witness this passion in an unparalleled atmosphere at the All European Confrontation in Colmar. Breeders have already been preparing for this great event for several years and we would like to thank in advance the organization and participants for putting forth such a great effort and allowing us to enjoy a fantastic show. From the small regional shows, local fairs to national competitions, we understand and thank the numerous organizers and volunteers. These events are important for our industry to show consumers how much we care about our cows and to teach our children about that love and passion. Even in tough times, it is important to still enjoy the work you do and we believe exhibitions can help us with that. This magazine is highlighting the great improvements that have been made over the last decade in IVF techniques, a tool that is an absolute must for the intensive breeding programs that are competing internationally. We hope to see you at one of the summer events and would like to extend a special welcome to our European Classic Sale held on July 8 in Krefeld, Germany.

Good luck in all your work and wishing you a beautiful summer!

Best regards, The Hotspots Team

Pine-Tree 2149Robst 4846

➔ Unparalleled achievements from a time-tested bloodline

It's pretty incredible when you consider the influence of a single individual who just celebrated her fifth birthday. In a very short time, Pine-Tree 2149Robst 4846 has put more than a dozen sons in A.I. with over half being used as mating sires in countries and systems around the globe. However, to have this type of impact, several key pieces must come together. Let's start with pedigree, 4846 is backed by a very special matriarch in Wesswood-HC Rudy Missy EX-92 GMD DOM. In between, there are four generations of precise matings by the Steiner family of Pine-Tree Dairy, Ohio to get back to modern-day brood cow, Pine-Tree 2149Robst 4846 VG-86-USA DOM.

The start at Pine Tree

We would be remiss not to go back a couple generations and highlight the tremendous brood cows that came before 4846. We have already named Rudy Missy, next up is the Oman daughter Pine-Tree Missy Martha VG-86-USA DOM followed by the Shottle granddam of Robust 4846, Pine-Tree Martha Sheen VG-86-USA DOM. Several pre-

mier donors are daughters of Martha Sheen but most noteworthy are Ammon-Peachey Shauna EX-91-USA GMD DOM and the dam of 4846, Pine-Tree Zenith Sheen VG-87-USA DOM. From there Ethan Steiner of Pine Tree Dairy fills us in, "Zenith Sheen was flushed as a two-year-old to Robust resulting in one heifer and a couple of bulls of which Pine-Tree Suspect received a nice proof at Select Sires."

In November 2011, that only Robust daughter of Zenith Sheen sold on "The Best of Rudolph Missy and Pine Tree Dairy Sale". The gavel dropped at \$75,000, Pine-Tree 2149Robst 4846 was second high seller of the day and headed to her new home at Country Dairy, Mich. "Prior to the sale we didn't expect 4846 to sell that well but she looked really good at sale time and we were very happy with the sale results," Steiner added.

Steiner continues, "The Robust line is by far the most successful now but there have also been some good offspring from two Colt-P daughters of Zenith Sheen." Pine-Tree 5242 Styl 6186 RC PP sold for \$70,000 in the 2014 International Intrigue Sale and has several high offspring. Pine-Tree 5092 Sym 5946 *RC sold in the March 2014 Holstein Plaza

Online Heifer Sale to Brey and Hul-Stein and has a GTPI+2653 Delta daughter and a GTPI+2490 red Atwork that ranks No. 1 GTPI Red Heifer in Europe. All offspring that add an interesting dimension of polled and red to the family.

Queen of Country Dairy

It didn't take long for 4846 to make herself at home and become a farm favorite of Country Dairy. The timing was key according to Nick Mitteer, Herdsman, Country Dairy, "We were just getting into the IVF business and thought we could really use a good management trait female after concentrating on production and type in past years. The industry was starting to put more emphasis on health traits and we needed to move with them."

Mitteer quickly credits the Steiners as being well ahead of most when it came to health traits. Country Dairy had been consulting and working with Les Terpstra, N.M. (formerly Wisconsin) on other females and used his expertise on this sale. After studying the "Best of Rudolph Missy and Pine Tree Dairy" sale lineup, Terpstra picked out a few heifers. Lot 19 had intrigued him and he liked that she had a little different pedigree. "She jumped out; once I got to the sale I realized she was easily the nicest heifer in the lineup," Terpstra shared. "I called Wendell Van Gunst, Owner, Country Dairy and told him it was going to take more money to get her bought." Van Gunst agreed and 4846 was struck off at \$75,000 and headed to Country Dairy.

It was shortly after 4846 turned a year old that her flush program kicked off, another key piece to the equation. "We decided to first use Uno as he had come out a few months before and we really liked his balanced proof. He had the type she needed and she had the production he needed," Mitteer shared.

Following the advice of Terpstra, 4846 moved to Genetic Futures, Wis. shortly thereafter where she did extremely well making embryos.

Known for her fertility, 4846 has been flushed to nearly 30 different mating sires with great success and achievement along the way.

"When the genomics started coming back is when I knew we had something really special on our hands. Everything kept falling into place," Terpstra added.

When asked about choosing mating sires, Mitteer responded, "Terpstra and I stayed in close contact in the beginning deciding who we

liked best and then discussed with the owners. For the most part we decided to stay contract-free and made decisions once we had genomics."

Les Terpstra, Rock Hill Dairy
"She [4846] is one of the most unique cows in that everything they bred her to worked."

"The matings seemed to click and it was a collaborative effort between myself, Van Gunst and Mitteer." Terpstra concluded, "They are great people and having the opportunity to work with Wendell and Nick made it even more fun."

McCutchen mating of impact

"Her mating to McCutchen was my favorite all-time flush. Not only did we get Monterey, but also Alabama. We transferred 22 from her that day and I had pushed for that mating because of his stature, strength and production. I've always loved show cattle's size and ability to do it all. I knew I wasn't getting show quality females, but I still like to dream," Mitteer shared.

From the beginning, View-Home Mcc Alabama has been one of the highest indexing McCutchens and will be one of the most impactful 4846 daughters. "Mainly because of her ability to flush like her mother," Mitteer confirms. "At the end of the day you just need transfers."

Alabama fresh in January currently has five daughters over +2700 GTPI. "Alabama will not be as impactful on the male side as her mother but her female side has dominated from the beginning."

View-Home Silver Orchid, sired by Seagull-Bay Silver, is Alabama's highest indexing daughter at +2789 GTPI and is currently the No. 6 flush-age heifer in the U.S. Turning a year old in June, Orchid already has 15 pregnancies and the excitement for the next generation continues to build.

Alabama's full sister, View-Home Mcc Found VG-87-2YR-CAN, is having a similar impact across the border for Claynook Farms, Ontario. Originally sold as a choice for \$50,000 in the April 2013 Genomic Giant Sale, the successful buyer chose Found at GTPI+2531 over full sister Alabama at GTPI+2528. A year later, Found was resold in the 2014 New York Spring Sale to Claynook Farms.

"It was a bit of a risk buying Found because she was already 13 months old at sale time and sold for \$80,000. But she was an interesting heifer for our program, scoring high on both GTPI and LPI," Dennis Wagler, Claynook Farms explained. Found was flushed by her new owners a few times before getting bred and the early results were tremendous. "The flushes resulted in three bulls that went to A.I., two Supershot sons to Semex and a Silver to ABS Global," shared Wagler. Claynook Fransisco at ABS currently has the highest GTPI at +2657 and Claynook Felix at GPA-LPI+3329 is the No. 9 Young Bull in Canada following the April 2016 run.

Claynook is currently working several daughters of Found by Silver, Supershot and Doors Open who score as high as +2679 on GTPI. Claynook Flounder Silver also scores extremely well on the German system at gRZG+160. "We started the Silver and Supershot daughters at a young age on IVF and combined with their dam, Found, we now have over 100 pregnancies confirmed," Wagler added. Today, Found still ranks as the No. 9 GLPI Cow in Canada and the family at Claynook is very happy with the results of this venture.

Yes the success of the McCutchen daughters has been huge but no one could have predicted the excitement surrounding the genomic young sire, View-Home Monterey.

Mitch Amundson, ABS Global

"Monterey was one of the most anticipated genomic young sires to ever hit the ABS market."

According to Mitch Amundson, Global Dairy Brand Manager, ABS Global, his industry leading TPI and Net Merit rankings combined with his unique type figures excited even the most skeptical type and index critics. "We have sampled numerous sons and they follow the pattern of high type marks and impressive production and fitness traits. He has successfully been used on Numero Uno, Supersire and Oman bloodlines, which are prolific in the Holstein breed today."

The male side

The power of Monterey alone is quite remarkable but when you consider Powerball-P, Cashflow, Missouri, Mandate and others, the global impact of this maternal line soars. All by different mating sires, topping the charts one after another with numbers that hit in several systems around the globe, 4846's achievements are unparalleled in this industry.

Nick Mitteer, Country Dairy

"Robst 4846 has put a lot of bulls into stud yet two stand out above the rest. I love Powerball and Monterey for what they bring to the breed."

Country Dairy had noticed what Pine Tree and others were doing with polled matings and wanted a chance to create a unique female. The decision followed to mate 4846 to Da-So-Burn MOM Earnhardt-P and the results were four polled bulls and three horned females. "We didn't get our female but we did create a bull that opened up more eyes to polled. Once known as a niche market, Powerball-P stood at the top with the GTPI bulls," Mitteer commented.

Genetics worldwide

Due to the popularity of the bulls there is no doubt that Holstein breeders worldwide have taken the opportunity to add Pine-Tree 2149Robst 4846 genetics to their herd. Some breeders have also taken the opportunity to buy into the family on the female side. "We've kept a few great ones but also continue to allow others to buy into the family," Mitteer shared.

View-Home Auburn, the GTPI+2686 Alta1stClass daughter of Alabama is one family member that Country Dairy parted with topping the 2015 National Holstein Convention Sale at \$103,000 to Peak Genetics, Wis. With a GTPI of +2720, View-Home Lottery sired by RockyMountain Lottomax was the successful private purchase of West-coast Holsteins, British Columbia. At GenoSource, Iowa several family members reside including the VG-86-USA Daddy daughter, View-Home Daddy Jersey with several offspring and the highest GTPI direct daughter of 4846 at +2652G, View-Home Silv Nashville. Nashville was purchased off the More Fun in the Sun Sale for \$81,000. Also calling GenoSource home is View-Home Snap Dragon GTPI+2642. Dragon was the winning purchase from the December 2015 Holstein Plaza Online Heifer Sale. The highest GTPI milking daughter of 4846 is View-Home Mrdian Iowa VG-86-USA owned by Bovine Genomic Partners, Mich. and sold on the October 2015 Holstein Plaza Online Heifer Sale. "So far all the females we have sold have gone Very Good. That's something that we are very happy about," shared Mitteer.

As the success stories continue so will the impact of this tremendous maternal line. Wesswood-HC Rudy Missy is epic in her contributions to the Holstein breed and following in her footsteps is Pine-Tree 2149Robst 4846. It was the first big purchase for Country Dairy of Michigan and one that has exceeded all expectations.

HOLSTEIN PLAZA

ARTHUR PATRUS BELLO, Brazil
Purchased Savape-Leiph Licorice Family Embryos

“We are very satisfied with AMS/Holstein Plaza services! They are very honest and clear with business. Our results were better than expected, and the products (heifers and bulls) from the cow families are so beautiful. Certainly we’re increasing the genetic power of our herd. Above you can see how happy they are here on our farm! Thanks to the staff. ”

THE BUYING STOP FOR DAIRYMEN AROUND THE WORLD

FEDERICO STRAMARE, Italy
Purchased Lavender Ruby Redrose Family Embryos

“Thanks to Holstein Plaza I had the possibility to access the best North American genetics at very affordable prices. There is always a wide range to choose from, whether you are looking for show type or high genomic you'll surely find something that meets your needs. Also the staff is great, ready to help you out with any problems and they take care of everything. All I had to do was pick up the embryos once arrived at destination. Purchasing with Holstein Plaza has been fast and easy, and I will sure continue to look here in the future. ”

BEN DYER, Bower Park Farm, United Kingdom
Purchased Butz-Butler Gold Barbara Embryos

“We purchased three IVF Sexed Sid embryos from Butz-Butler Gold Barbara and have two pregnancies so we are very happy. We are also very happy with the speed in which they arrived and the whole process was very good. Now just got to hope for a couple of jet black show heifers. ”

SAM ZIMMERMAN, On-Q Holsteins, United States
Purchased Wilstar-Rs The Limited-Red Family Embryos

“From the Absolute x Wilstar-RS Kite Lover-Red embryos we ended up with a really nice heifer. She was first spring calf at the Minnesota State Fair 2014 and came back winning the spring yearling class at the Wisconsin R&W Championship Show 2015. I also had great pregnancy rate with the Doorman embryos purchased from the Alicias. ”

MICHAEL LEAHY, Leahy Farms Inc, United States
Purchased Mc Welcome Colby Taya Family Embryos

“Typically we have a success rate with frozen IVFs that is roughly half of our sexed semen success rate. Our sexed semen success rate for this group of embryos was 80%. We had anticipated a 35-40% success rate. The last group of IVFs we implanted resulted in seven pregnancies out of 12 eggs. Results average out over time. Combine the last two sets and we are right at the 35-40% range. Your site is by far the easiest to use. Has the largest selection. Most importantly the best service. ”

- Reserve Intermediate Champion, Midwest Fall National 2015

ture stems from a pedigree destined for greatness. Sired by Braedale Goldwyn, Divine is backed by an EX-92-6E Dundee followed by a show-winning EX-94 Triumphant and four more generations of VG or EX and a deep Canadian maternal line.

Owner Comments: Dan Hovden, "Divine was actually purchased on Facebook. We had come across a shared post from Ferme Arolene regarding Divine

and followed up with a request for more photos. They had mentioned that Callum McKinven had won with her at a small show in Quebec so I called Callum and asked his opinion. He said that she wasn't a Madison heifer but that she was going to make a great cow, he was right. As hoped, Divine calved in with a beautiful udder and following her success last fall Rosedale became part owner. Fresh again in March, Divine was HM Grand of the Midwest Spring National Show and we are very excited for the rest of the show season."

Story: Divine's fan base increased this past April being named Best Udder of the 2016 Midwest Spring National Holstein Show and Honorable Mention Grand Champion. This exciting young cow with a bright fu-

- Champion Two-Year-Old, Dairy Fair Mariënwaerd

Championship. Her full sister DH Gold Chip Darling was HM Grand Champion at the Swiss Expo & Expo Bulle 2016. The qualities of incredible type are marked in this cow family, her fourth dam is the full sister to legendary Durham, followed by Snow-N Denises Dellia EX-95-USA. A family which not only delivered Durham but also Dundee, Damion, Iota, Halogen and several others.

Owner Comments: Jan Koff: "Darling 2 is a cow I would like to have a herd full off, she has incredible

type and also can easy handle herself in our freestall robotic dairy farm. She easily went Excellent as a four-year-old and has a few incredible Doorman daughters on the ground, one which sold to Italy. At the moment we have embryo inquiries from multiple countries including Switzerland and Canada and are also trying to make a few more daughters from her for ourselves. The consistency in this family is incredible, her milking sisters in France have won shows, her Swiss sister was HM Grand Champion at the Swiss Expo and in Australia another full sister recently calved and looks very promising!"

Story: Darling 2 is a result out of the golden combination of Gold Chip from Mr Sam Darling. She has only been shown once as a two-year-old at the Mariënwaerd Dairy Fair where she won the two-year-old

C. MDF GOLDWYN BREEZER 40 | EXCELLENT-91-USA EX-MS

- 3rd Senior 3-Year-Old, Midwest Fall National 2014

bottom side this was a mating bound for success. Her dam is the huge producing EX-95 RF Outside Breezer followed by an EX-2E-CAN Milan then Beauty herself. Breezer has several fancy daughters on the ground and is currently being flushed at Willows-Edge Holsteins, Wisconsin.

Owner Comments: Bonnie Van Dyk, "We were just so impressed when Barbara won the Midwest Fall

National Holstein Show in 2010. We were tied right next to her and all week admired her youthfulness knowing she would go on to do well at even bigger shows. When we found out her maternal sister, Breezer, was to be offered on the Luau II Sale we decided to purchase her as she was the kind of cow that fit our program. Breezer had the pedigree, youthfulness and ability to transmit. She has a beautiful Absolute daughter on the ground and embryos by Sid and Doorman with plans on getting her bred back."

Story: A unique Goldwyn maternal sister to the beloved All-American and All-Canadian Rainyridge Talent Barbara *RC, Breezer already scored EX-91 is creating her own legacy. With Braedale Goldwyn on the topside and the tremendous Tony Beautys on the

→ Maximize the results of your IVF program

As the IVF technology continues to progress in its development and availability, more breeders are utilizing this management tool through satellite centers and labs across North America and Europe. With the increased popularity, Hotspots decided it was a good time to update readers on IVF and see how it is being implemented. What are the results? How are breeders using IVF in their breeding programs? What guidelines do they use to make it a profitable reproductive technology?

To give you a quick overview, IVF is a process that creates embryos from oocytes, unfertilized egg cells, by fertilizing them with semen in a lab. The egg cells are collected from the ovaries of a donor using ultrasound-guided follicular aspiration. The egg cells are then matured in a petri dish and fertilized between 20-24 hours after collection. For the next seven days the oocytes will develop in an incubator, at that point the viable embryos are transferred into recipients or good quality embryos can be frozen.

It starts with the donor

Setting up a successful IVF reproductive program starts with the donor.

Jeff Ziegler, Select Sires

“It all starts with getting optimum calf care on any female that may be a potential donor someday. Keeping calves growing well, respiratory disease free, and properly vaccinated are key to getting a donor on an IVF program at an early age.”

John Metcalfe from Crosswell Holsteins, UK agrees that attention to detail is important. “Diet management in preparation for collection is

crucial, as is a balanced mineral intake. Stress factors must be minimized, such as dietary and management changes, and handling. Donor cows must be in good health and moderate body condition,” Metcalfe added. With good growth and development donors can start IVF at an early age, as long as the donor is physically mature enough to do so. That age according to the TransOva Genetics website is at least 10 months before collecting oocytes.

The results on very young heifers are much more variable confirms Jonathan Lamb, Oakfield Corners Dairy. “We don’t IVF heifers until they are pregnant, we had found too much inconsistency for the cost.” Lamb continues, “IVF can be a costly technique if the results are not good; however, with good donor selection we are able to work females every two weeks with good results.”

Jonathan Lamb, Oakfield Corners

Our goal is to make three pregnancies per aspiration but that number is not just dependent on the donor, semen quality is also a huge part of it.”

Jan de Vries, Diamond Genetics shares the opinion of Lamb, “With IVF we can now keep working pregnant donors, and if a heifer doesn’t work well flushing conventional we can try her on IVF. A good example would be Tir-An N.U. Nyala who we own with Rijnhof Holsteins. She didn’t flush well for us but worked in IVF resulting in 50 sons and daughters, from which she now has eight sons in A.I. by different mating sires.”

For many breeders including Lamb, IVF has shown to be quite valuable in making show calves from older brood cows. “IVF in general works well on older cows, one of the main advantages is that we can use the reverse sorted technique so we do not get any bulls. If they

Mark Comfort, Comfort and Thurler Holsteins

“In 2013 we had one of the top 25 Supersire daughters under eight months ago. We started to IVF her every two weeks with different high genomic sires. We were fortunate that three of the five genomic sires hit big. Resulting in five sons sold to A.I., a female that sold for a top price and two more valuable heifers that we have done much business with.”

ADVANTAGES	IVF
	Averages 4-5 embryos per collection every two weeks vs. average 5-6 embryos with ET every five weeks
	Can be performed on pregnant donors
	Can be performed on juvenile heifers
	Can be performed every other week
	More embryos per time cycle
	Less semen costs
	Some countries have access to reverse sorting technique

don't work as well anymore we stop and move on to the next female," Lamb shares. In addition to the reverse sorted technique, breeders find value in being able to make offspring from pregnant females so their calves in time for the next show season.

On donor selection, Comfort adds, "We select our very best donors from families with an excellent flush record and stay with donors that produce well in their first aspirations and continue to establish that pattern in the second and third."

"It is important to be patient and understand that some donors will not make many or any embryos with IVF protocol no matter what dietary, or protocol changes you apply," Ziegler shared.

All breeders confirm that they are using FSH (follicle-stimulating hormone) to stimulate the donors. Tom Otter from the Diamond Genetics IVF lab has over 30 years of experience with IVF and adds, "With the use of FSH you will not get more oocytes but visible better quality and developed embryos. With good donors you will collect on average 18 oocytes and with 30 percent (vs. 20 percent without FSH) of them turning into embryos you will get four to five embryos per aspiration." In Europe, Folltropin or Pluset are the most used hormones to stimulate FSH with cows and heifers getting injected four times prior to an IVF oocyte collection.

The key to success: pregnancies

"The greatest success comes in the form of multiple full sibling pairs to genomic test to find the outlier from their parent averages. Our current success story includes the No. 2 and No. 4 GTPI ranked bulls in the breed S-S-I 1stClass Flagship-ET and S-S-I Montross Jedi-ET. These maternal brothers hail from the most prolific donor we've worked with to date, S-S-I Supersire Miri 8679-ET. A more current example is a pair of Kingboy donors from the same family that are currently excelling in IVF work with approximately 100 pregnancies combined prior to these donors reaching one year of age," Ziegler shares.

Once you have the embryos, whether collected from your own donor or purchased it is important to make the pregnancies. As mentioned earlier, the goal at Oakfield Corners Dairy is to make three pregnancies from each IVF session, so it's key to have good recipients to transfer the embryos. "On the recipient end it's important to have a good ration with enough energy. Recips work better if they are in adequate condition. We transfer IVF embryos between days five and nine after their heat. Our results show that transferring them between days seven and eight give the best results," Lamb shared.

Comfort follows a similar timeline adding, "We implant all embryos

approximately seven days from heat. There is some variation of heats following synchronization, so each heifer is examined by the vet for stage of ovulation. Embryos are implanted according to their maturity and matched to each recipient." Metcalfe also has similar experiences, "We implant embryos seven days after fertilization, so eight days after collection of the oocytes. As with conventional recipients they need to be on a balanced and consistent diet with good mineral supplementation. Body condition score should be around 2.5. Heifers tend to give slightly (5-10%) better hold rates, but clean and cycling cows having had less than four calves are also suitable. Routine treatments such as worming, vaccination and foot trimming should be avoided during the program."

Tom Otter, Diamond Genetics

"The success of your IVF and flush program is as strong as your weakest link, being critical towards every step of the process is tremendously important."

Comfort and Lamb both mention that the pregnancy rate is about 10 percent lower than conventional embryos transferred. "The average pregnancy rate is a bit lower with IVF embryos than conventional, approximately five to 10 percent for embryos transferred fresh." Lamb said. However, at Oakfield Corners they do not see any difference in pregnancy rate on frozen IVF vs. frozen conventional embryos. An interesting breeder observation is that the results of frozen IVF embryos are in general better than from the IVF embryos transferred fresh. "My understanding is that this is due to the fact that they grow and mature in a lab under controlled conditions. TransOva is also extremely critical when it comes to freezing IVF embryos, they will only freeze the absolute best quality embryos whether they are graded No. 1 or No. 2," Lamb added.

Otter from Diamond Genetics agrees, "With being extremely critical towards the embryos we freeze we are able to get close to the pregnancy rates of frozen conventional embryos. As the cell binding is extremely important we only freeze the best embryos. It takes a lot of practice and experience to develop a good eye for this."

As we conclude, the breeder feedback has certainly been invaluable in reviewing this reproductive tool. "The biggest advantage is that you can aspirate a donor every 14 instead of 45-days. So you can work a donor three times as often and use a different bull each time. Variety in sires becomes important to have long-term genomic progeny success. Although the costs are higher with IVF, the progeny results have yielded bigger profit returns," concluded Comfort.

The Muri Planet Popsys

Global fame with a touch of 'Italian Style'

Italy... a country beloved for their incredible food, Italian style and off course great Holsteins. It is where influential sires were born and some of the best global cow families were created. A Canadian background, solid breeding decisions and a lot passion are the ingredients of one of Italy's finest cow families: the Muri Planet Popsys.

Piëmontese to No. 1 production

Ten Canadian cows are the foundation of the Muri Holsteins herd for brothers Mario and Franco Morisiasco. Until the Canadian cows arrived in 1977, the herd was composed of the Italian breed, Piëmontese. One of the newest arrivals was Hillwood Countess Patti and the start of the Popsy pedigree on Italian soil. Today, Muri Holsteins is an extremely well respected name in the Italian dairy industry, managed by sisters Claudia and Stefania Morisiasco and milking 260 cows three times per day. In recent years, they have had great show successes, topped genomic rankings and were the highest production herd in Italy, all successes that can be attributed back to a family started with Patti.

Production, show and GENOMICS

A few generations later in 1987, Muri Complete Navanna was born. A

true example of this family's extreme quality and the eighth generation before Popsy. In these eight generations we see a mix of outstanding attributes. Navanna scored EX-90 and produced more than 95,000 kg milk, her Southwind daughter created a great show type branch with EX-92 and EX-91 daughters by Prelude and Storm. A more important branch started through her EX-92 Commander daughter, Quayanna. A cow that did well at multiple shows for Muri Holsteins but also is the source for the strong index branch of the family.

"We always knew the cow family we worked with had outstanding qualities by the performances we discovered in our barn. In addition, the family already had some animals in the Top 100 PFT. It was a phenomenal reward for us, the experiences we received from this cow family. It was confirmed by the genomics and from there we could show that to the rest of the world," shared Claudia Morisiasco.

Dream Cow - Nutella

The goal at Muri Holsteins is breeding for strong, long-lasting, good looking cows. "Our ideal dairy cow has dairy strength and show femininity along with great udders. We enjoy the good looking cows, but the traits we like also help for high lifetime productions," Morisiasco said. Fulfilling the Muri Holsteins' goal, Bolton Nutella is scored EX-90 and the looks the part. In addition, she has produced more than 80,000 kg of milk and is still active in the herd

Muri Bolton Nutella EX-90-IT
A dream cow for Muri Holsteins

Muri Planet Popsy VG-88-IT
She put the family on the map

All.Nure Numero Uno Pepita
Sold as a First Choice for a European record price: € 101.000

currently completing her fifth lactation. Morisiasco confirms, "She is a dream cow for us."

Dream cow Nutella has multiple daughters at Muri Holsteins and they are still working on to get more progeny out of her, recently she flushed to sexed Jedi which created 5 pregnancies. Beside that there is a 2nd calf Supersonic, a 1st calf Supersire and a daughter out of the golden cross on Nutella Muri Planet Popsy (Popsy's full sister). She is the dam of 3 Doorman daughters from which one sold to the breeding program of the Inseme group and another one recently won the Championship in the Young Cow Class and Champion Best Udder at the regional show. And another member of the family Muri Sanchez Regia has been pre-selected for the All-European Championship in Colmar 2016!

Global fame, thanks to POPSY

The best and most influential combination made on Nutella was easily the mating to Ensenada Taboo Planet, resulting in the star of our article, Muri Planet Popsy. In April 2012, she created a global sensation becoming the No. 1 GTPI Cow in Europe and the No. 1 GTPI Outcross Cow worldwide with no Shottle, Oman and/or Goldwyn in her pedigree. All sires that were very dominant in the pedigrees of the top ranking cows of her time.

"We knew the family performed outstanding in our herd, it was a great reward for us that this was confirmed by the genomics."

These results caused a thunderstorm of interest from all over the world. Giorgio Rosetti, Al-Be-Ro Holsteins, moved quick following Popsys genomic success and became a partner in this global star. Popsy moved to the herd of Al-Be-Ro Holsteins, Piacenza, Italy and joined several other stars both in index and in show. Popsy scored VG-88 in her second lactation is still milking at Al-Be-Ro Holsteins and has already produced 54.192 kg of milk with 4.1% fat and 3.4% protein in two lactations!

Record price and next generation

The storm of interest continued and was on full speed during the Holland Masters Sale in 2012 where Popsy's first choice female (sired by Numero Uno) created a worldwide bidding frenzy and sold for a final price of EUR 101.000, the highest price ever paid in a European auction. The buyer was an international group of

breeders including Diamond Genetics (NL), Eclipse Holsteins (Australia), Cormdale Genetics (Canada), Muri Holsteins and Al-Be-Ro Holsteins (Italy). The result of the combination was just like what every buyer hopes for, it delivered the new No. 1 GTPI in Europe, All.Nure Numero Uno Pepita, and her full sister Popsy. Today, Pepita and Popsy still rank as the No. 2 and No. 3 GTPI Numero Uno daughters in Europe.

Through these Numero Uno sisters the huge genomic branch of the Popsy cow family spread. It is influencing the breed through multiple high ranking sons in A.I. and chart-topping genomic daughters. For example, Pepita's Kingboy son at Intermizoo, DG Popstar, is the No. 1 gPFT sire in the Italian rankings with +3797 gPFT. Popstar is also one of the highest Kingboy sons worldwide for GTPI at +2604 and his full brother sold to German A.I. Commander son, DG Pluto, is at AI Total, combining +149 RZG with 130 RZE (type) and +2459 GTPI. Kingboy daughter DG Pricilla has a unique combination of over +2500 GTPI with over +3 points on type.

Pepita's full sister, Popsy, has multiple sons at Semex and Intermizoo and backs the current highest GTPI females from the family including the No. 1 and No. 2 GTPI Supershot heifers (>9 months) in Europe. All.Nure Supershot Paprika has a GTPI of +2697 and is one of the highest Supershot daughters in the breed for type with a PTAT of +2.50. Paprika is a working on her career in Holland under the ownership of Diamond Genetics and Hul-Stein. Her full sister Paris with a GTPI of +2687 is still owned by Al-Be-Ro Holsteins and Muri Holsteins.

The Next Generation... full sisters All.Nure Supershot Paris, Priska and Paprika. Paprika and Paris are the No. 1 and No. 2 GTPI Supershot heifers (>9 months) in Europe.

Choose your favorite Supersire

In April 2015, Seagull-Bay Supersire bred by Seagull Bay Dairy, Idaho made his debut as the No. 1 GTPI Proven Sire in the Breed scoring GTPI+2613. He was the first ever proven sire to score over +2600G and one proof run later he would march on to become the first ever to score +2700G. Today, Supersire still scores a remarkable +2697 GTPI combined with +2464 PTA Milk, +116 Fat and +75 Protein with good scores for Somatic Cell and Productive Life. He still holds the No. 1 GTPI Proven Sire position scoring nearly 80 points higher than the No. 2 and amongst the highest of all bulls with semen available, a remarkable achievement from a bull born 5.5 years ago. In his current index there are 3820 daughters on 1045 farms milking over 30,500 lbs. milk with over 1200 lbs. Fat and 955 lbs. protein. His dam, Ammon-Peachey Shauna EX-91-USA GMD DOM, is one of the most highly respected brood cows in the industry and backed by the tremendous Wesswood-HC Rudy Missy. Shauna is also the dam of Headliner, Platinum, Diamond, MVP and Sargeant but Supersire is undoubtedly her most influential son. This breed impacting influence can already be seen through his sons and daughters.

Popular young sires Supershot, Josuper, Solaris, Boastful, Brodie, Avenger, Marty and AltaBurner were all intensively used as mating sires. While his daughters have produced the popular Modesty, Jedi, Flagship, Apprentice, AltaSuperstar, Gatedancer, Abel and there will be many more in the near future. With so many interesting and successful Supersire daughters across the globe, we're sorry but just couldn't include them all.

A WCD-ZBW Supersire Lavage

Owner Oakfield Corners Dairy (USA)

Supersire x EX-90 Man-O-Man x VG-89 Shottle x EX-92 Bolton x VG-87 Goldwyn x VG-89 Igniter x VG-85 Emerson x VG-87 Blackstar x Comestar Laurie Sheik VG-88 23*

Genomic Index

US 04/16 NM\$ +800 / PTAT +1.39 / GTPI+2624

No. 1 GTPI Red Cow in the World

AMS Genetics has 30 years experience in the sourcing and exportation of Holstein embryos to the world. Although many things changed over the 30 years, one thing is still constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need. If you are looking to purchase embryos to introduce new genetics into your A.I. company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasize your selection criteria, so we focus on the genetics that will do the best job for your goals.

Services:

- Sourcing and locating embryo donors
- Herd visitation selection tours
- Contracting of donors
- Complete coordination of: embryo recovery, health certification and documentation, inland assembly and international shipment insurance
- Housing and management assistance for cattle housed in the United States
- Sire sourcing/selection for A.I. companies worldwide
- Commercial dairymen sire sourcing and selection

HOLSTEIN PLAZA

THE BUYING STOP FOR DAIRYMEN AROUND THE WORLD

Sold! ... a sample of the embryos sold in previous auctions

Solomon from the Apples
Solomons from three generations of EX-94 All-American APPLES

Chart-Topping PTAT
Archivals from the No. 4 PTAT Cow in the U.S. and the APPLES

Goldwyn from Hotstuff
Goldwyn's direct from the Res Grand Champion of WDE, HOTSTUFF

Superstar from Clear-Echos
AltáSuperstar embryos from the dam of Superhero and the Clear-Echos

Modesty from the Robst484bs
EARLY Modestys from the +2591G Tuffenuff granddaughter of 4846

Exactly from Ruby D Shawns
Exactly embryos from the +2608G Kingboy daughter +1850M and +3.10T

THE KIND WE SELL... Show Type, Top Genomics, Deep Maternal Lines, Sexed, IVF, Polled, Red

*M*ake HolsteinPlaza.com your first stop for embryos! Our online auctions are held the first and third week of each month. You'll find a variety of genetics at a wide range of price points (starting at only \$300/embryo). We make buying easy... your next purchase is just a click away!

TOP QUALITY SERVICE WITH WORLDWIDE DELIVERY

Responsive quality service backed by the experience of AMS Genetics. We coordinate worldwide delivery so your embryos arrive quickly and carefully to their final destination.

The Muri Planet Popsys

Global fame with a touch of 'Italian Style'

Italy... a country beloved for their incredible food, Italian style and off course great Holsteins. It is where influential sires were born and some of the best global cow families were created. A Canadian background, solid breeding decisions and a lot passion are the ingredients of one of Italy's finest cow families: the Muri Planet Popsys.

Piëmontese to No. 1 production

Ten Canadian cows are the foundation of the Muri Holsteins herd for brothers Mario and Franco Morisiasco. Until the Canadian cows arrived in 1977, the herd was composed of the Italian breed, Piëmontese. One of the newest arrivals was Hillwood Countess Patti and the start of the Popsy pedigree on Italian soil. Today, Muri Holsteins is an extremely well respected name in the Italian dairy industry, managed by sisters Claudia and Stefania Morisiasco and milking 260 cows three times per day. In recent years, they have had great show successes, topped genomic rankings and were the highest production herd in Italy, all successes that can be attributed back to a family started with Patti.

Production, show and GENOMICS

A few generations later in 1987, Muri Complete Navanna was born. A

true example of this family's extreme quality and the eighth generation before Popsy. In these eight generations we see a mix of outstanding attributes. Navanna scored EX-90 and produced more than 95,000 kg milk, her Southwind daughter created a great show type branch with EX-92 and EX-91 daughters by Prelude and Storm. A more important branch started through her EX-92 Commander daughter, Quyanna. A cow that did well at multiple shows for Muri Holsteins but also is the source for the strong index branch of the family.

"We always knew the cow family we worked with had outstanding qualities by the performances we discovered in our barn. In addition, the family already had some animals in the Top 100 PFT. It was a phenomenal reward for us, the experiences we received from this cow family. It was confirmed by the genomics and from there we could show that to the rest of the world," shared Claudia Morisiasco.

Dream Cow - Nutella

The goal at Muri Holsteins is breeding for strong, long-lasting, good looking cows. "Our ideal dairy cow has dairy strength and show femininity along with great udders. We enjoy the good looking cows, but the traits we like also help for high lifetime productions," Morisiasco said. Fulfilling the Muri Holsteins' goal, Bolton Nutella is scored EX-90 and the looks the part. In addition, she has produced more than 80,000 kg of milk and is still active in the herd
